

# Tungsten E full teardown

Written By: fscottcopeland

## TOOLS:

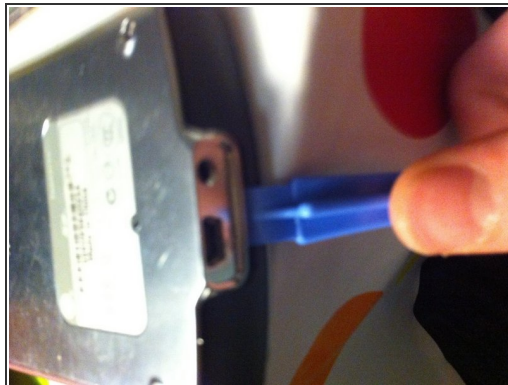

- [T5 Torx Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Teardown

- There are 4 torx screws in each corner. Undo them and take them out.

## Step 2

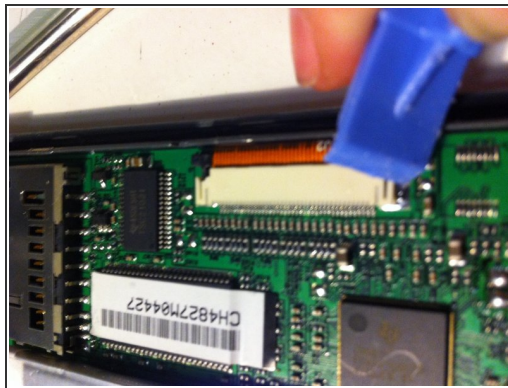

- Slide a spudger in between the metal casing. Slide it all around the casing, releasing the back from the clips holding it in.

### Step 3

- Prise up the case, using the spudger.

### Step 4

- The Lcd connector is held in with a double lock connector, simply push the locks forward, and the cable will disconnect with the help if a spudger.

To reassemble your device, follow these instructions in reverse order.
