

# Turtle Beach Ear Force X12 Audio Jack Case Replacement

Replacement guide for Turtle Beach Ear Force X12's audio board case.

Written By: Victoria Carlos

# INTRODUCTION

This guide will help you replace the case that houses the audio jack in case it is broken or cracked.

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Audio Jack Case

- Locate the audio control board and the three 1.10 mm screws found on the back.

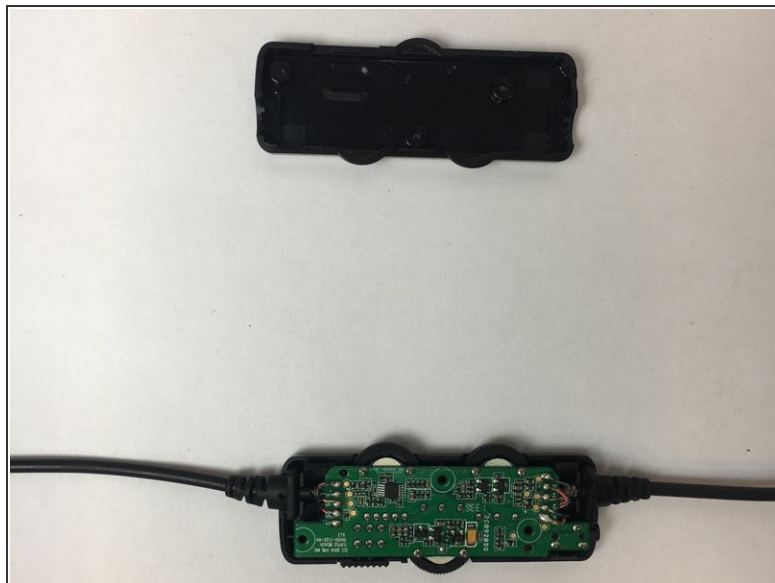

## Step 2

- Unscrew the three 1.10 mm screws using a #00 Phillips head screwdriver.

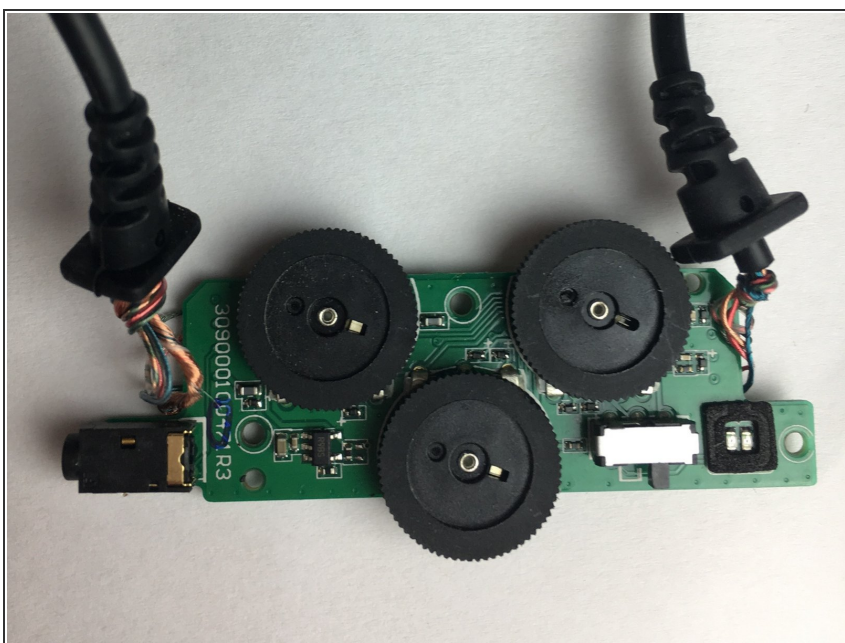

## Step 3

- Using a plastic opening tool, insert it between the two plastic pieces to pry it open.

**Note:** *The pieces should look like the second picture when it is opened.*

## Step 4

**⚠** Carefully removed the audio board from casing.

- Replace broken pieces with new ones and reassemble.

To reassemble your device, follow these instructions in reverse order.
