INTRODUCTION

The ear pads on the Turtle Beach Headset are designed to give the user complete comfort with their unique shape covering the entire ear for optimal sound quality. Although the ear pad material is very durable, they can become worn out over time. This guide will walk you through the steps of replacing the ear pads on your Turtle Beach Headset.

Step 1 — Ear Pad

- Begin by placing your thumb on the plastic edge around the ear pad.
- Get a good grip around the ear pad and gently separate it from the headset.

Step 2

- Apply the same instructions to remove the other foam pad off of the headset.
- ★ Make sure you continue to gently peel the ear pad from the headset until completely removed.

To reassemble your device, follow these instructions in reverse order.
