

Turtle Beach Elite 800 Charging Pins on Headset Replacement

This guide will show how to replace the charging contacts inside the right ear of the headset.

Written By: Johnny Lofton

INTRODUCTION

This is a guide on how to replace the contact pins inside of the headset.

TOOLS:

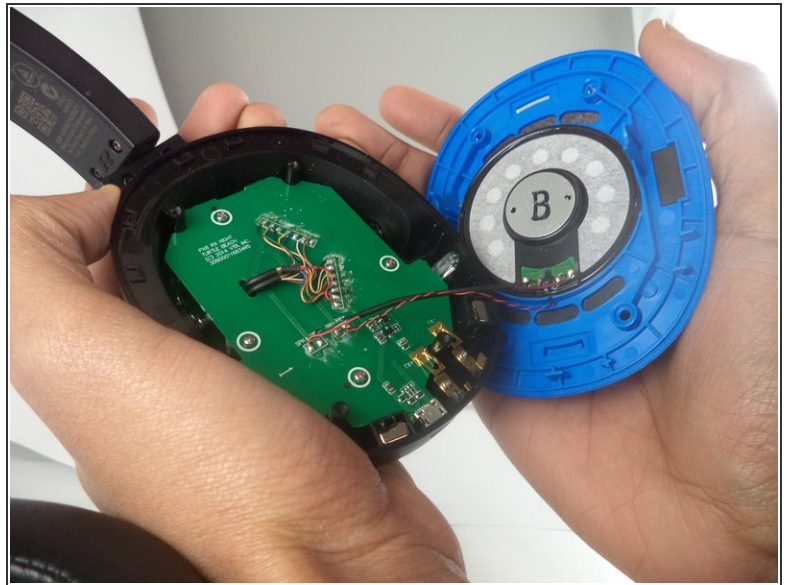

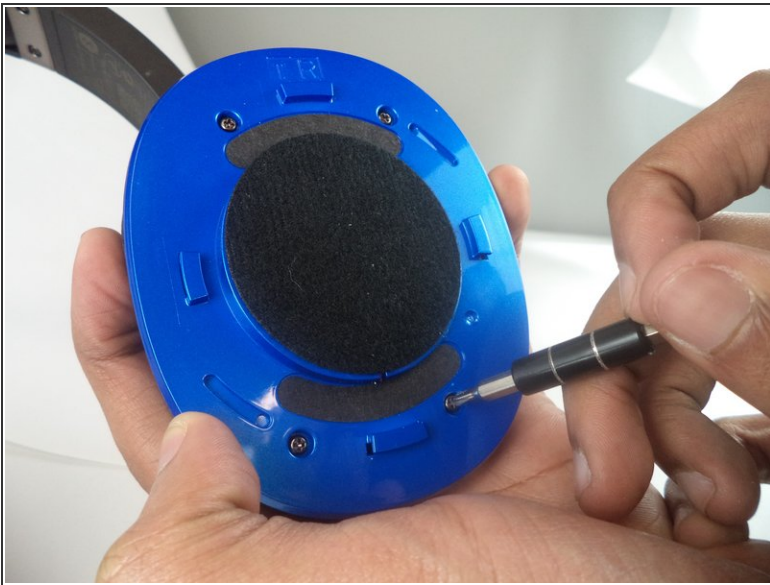

- [Phillips #00 Screwdriver](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Ear Cushion

- Remove previous ear cushion by rotating the clockwise and pulling it off.
- ⓘ When reassembling, be sure to line up the locking plates.

Step 2 — Charging Contact Pins on Headset

- Use the Phillips #0 screw bit to remove the four screws (9.47 mm long) that have been revealed from removing the ear cup. Carefully take off the blue casing to reveal the audio board.

Step 3

- Use the Phillips #00 screw bit to remove the two screws (7.92 mm long) that are holding the contact pins in place.
- Then, simply push the pins from the board.

To reassemble your device, follow these instructions in reverse order.
