INTRODUCTION

The battery of your device may need to be replaced if it drains quickly or does not charge.

TOOLS:

- J1 Screwdriver Bit (1)
- Heavy-Duty Spudger (1)

This document was generated on 2020-03-19 09:58:08 PM (MST).
Step 1 — Battery

- First, remove four 6.1 mm screws from your monitor using a J1 Phillips head screwdriver.
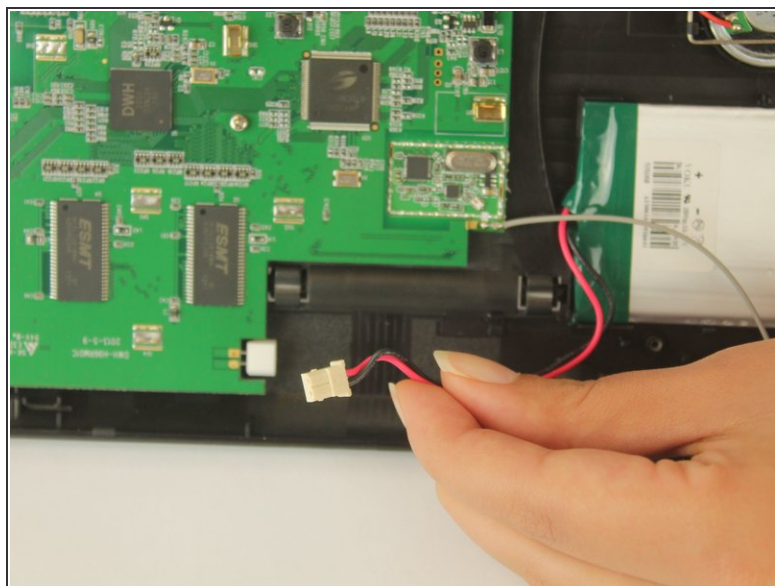

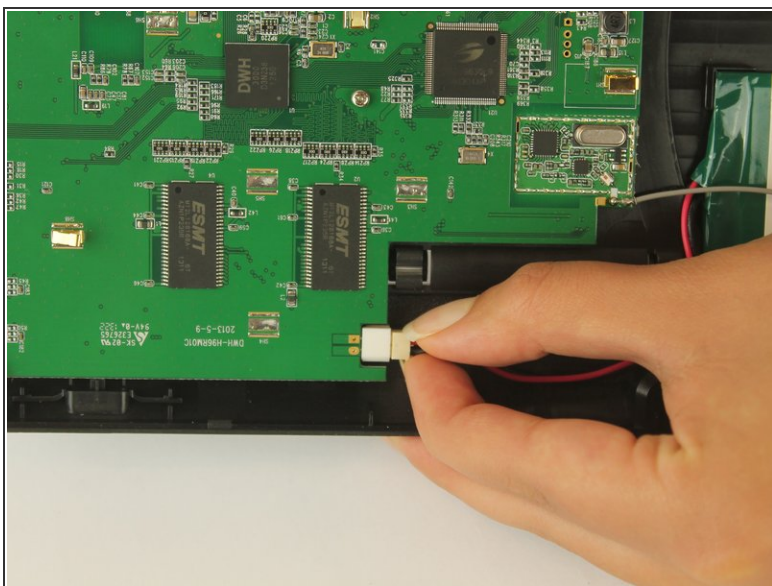

Step 2

- Carefully, use a metal spudger to open the case starting from any corner.

- Slowly slide the spudger along the inside edge of the case.

Step 3

- Remove the two 6.1 mm screws from the black fastener using a screwdriver.

- Remove the black fastener.

Step 4

- Disconnect the head of the cable attached to the motherboard by pressing on the outer edge of the cable and sliding it out.
