INTRODUCTION

If your Smartwatch is not charging, and you tested the cables, then the battery may need to be replaced. This guide will show you how to do this.

🔧 TOOLS:

- Soldering Iron (1)
- Tweezers (1)
- Phillips #00 Screwdriver (1)
- Solder (1)

⚙ PARTS:

- Replacement Battery (1)

Step 1 — Master Switch

- Begin by flipping the watch over with its back facing upwards.
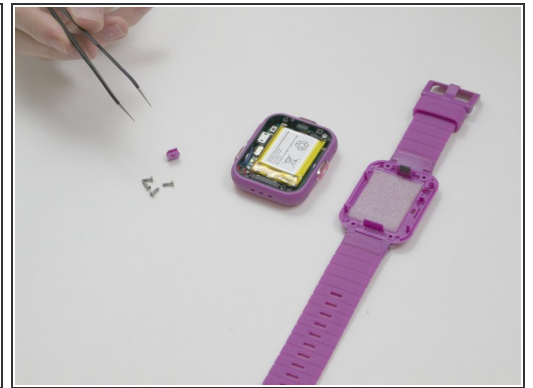

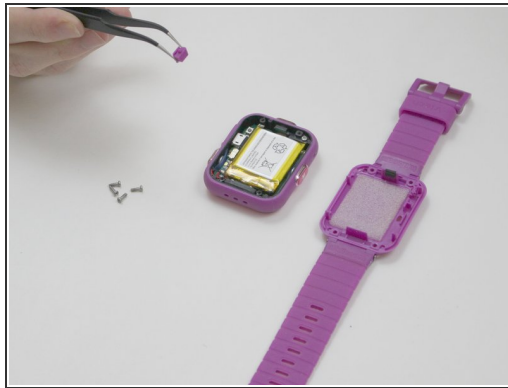

Step 2

- Next, use the Phillips #00 screwdriver to unscrew the four 6.0 mm screws located in each corner of the watch to remove the backplate.
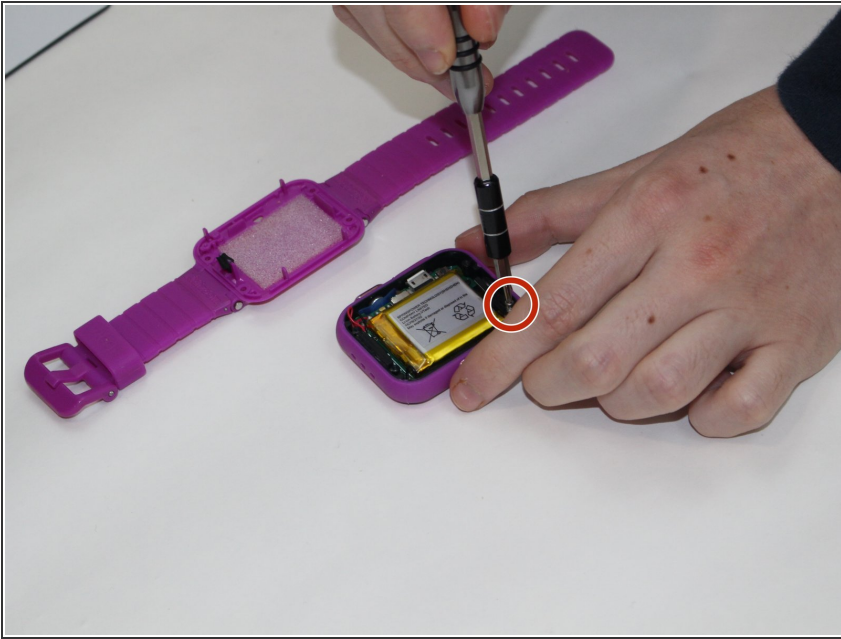

Step 3

- Gently lift the backplate up to remove it.

Step 4

- After removing the backplate, lift the master switch up from the circuit board.
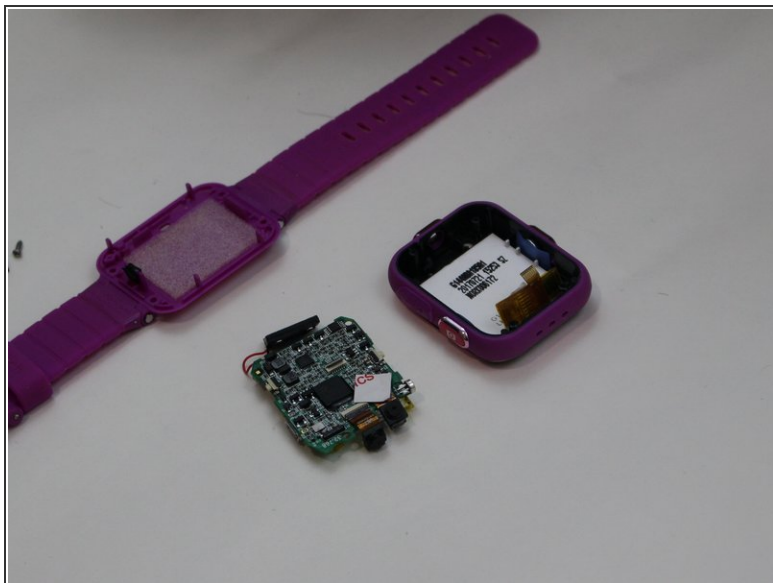

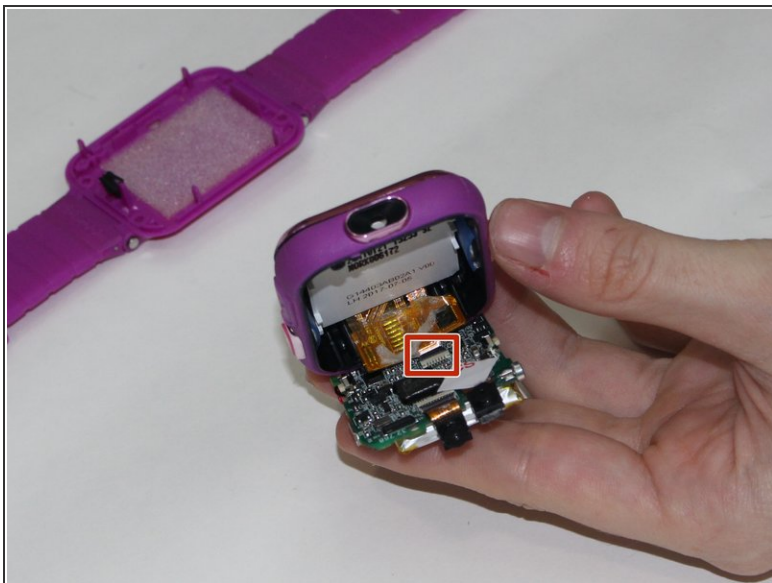

Step 5 — Motherboard

- Using a Phillips #00 screwdriver, remove the 0.6 mm screw.

Step 6

- Carefully remove the speaker from the case without disconnecting it from the motherboard.

Step 7

- Using the tweezers, carefully lift the bar holding the connection to the screen.

- Remove the motherboard from the device.

Step 8 — Battery

- Carefully pry the battery off of the circuit board using the plastic opening tool.

Step 9

- De-solder the wires connecting the battery to the circuit board.

- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
