

# VTech Kidizoom Smartwatch DX2 Wristband Replacement

How replace a VTech Kidizoom Smartwatch DX2 wristband.

Written By: Sydney

---

## INTRODUCTION

If your wristband has visible damage, is worn, torn or broken the following guide will help you repair your problem.

---

### TOOLS:

- [Metal Spudger](#) (1)
-

## Step 1 — Wristband

- Begin by placing the watch on its side.

## Step 2

- Next, use the flat end of the spudger to wedge between the small-headed pin (located on the band closest to the watch) to pull the pin up through the other side.

## Step 3

- Pull the pin out, however not fully, feeling slight resistance is normal.

## Step 4

- Finally, pull the wristband off.  
Repeat on the opposite side of the watch if necessary.

To reassemble your device, follow these instructions in reverse order.
