

VTech Safe And Sound DM221 "TALK" Button Replacement

VTech Safe And Sound Digital Audio Monitor DM221 "TALK" Button Replacement

Written By: Krystal

INTRODUCTION

Is your "TALK" button not working properly? Read this repair guide to learn how to replace it.

TOOLS:

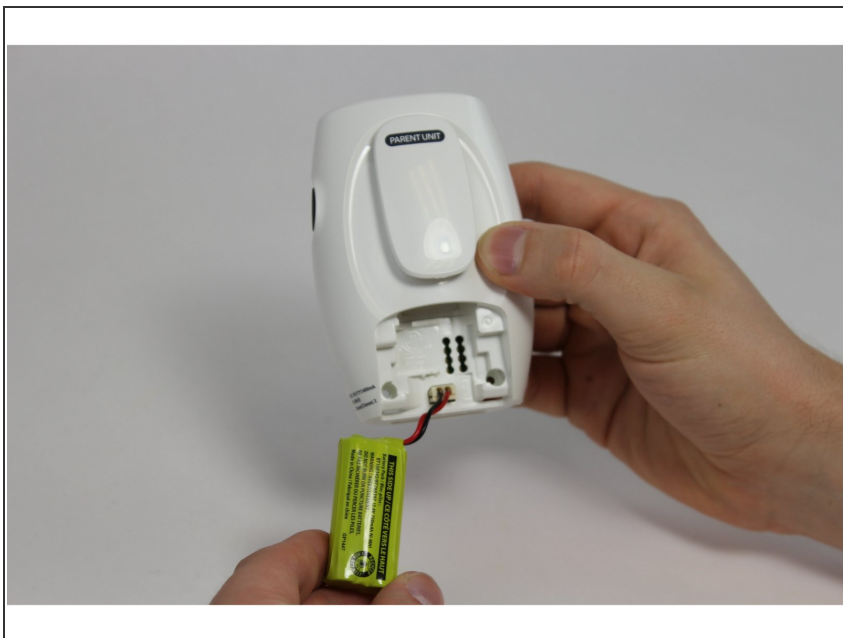

- [Phillips #00 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Spudger](#) (1)
-

Step 1 — "TALK" Button

- Remove the battery cover.

Step 2

- Unplug the battery from its connector and remove.

Step 3

- Using the Phillips #00 screwdriver, unscrew the two 5.0 mm screws at the bottom of the monitor.

Step 4

- Separate the back half of the device from the front using the metal spudger.

Step 5

- Remove the "TALK" button to get access to remove the motherboard.

To reassemble your device, follow these instructions in reverse order.
