

# VW Key Fob 2007 Passat Replace Battery Replacement

Written By: Daniel Green

# INTRODUCTION

How to replace the battery in a 2007 VW Passat Key Fob

## TOOLS:

- [Essential Electronics Toolkit](#) (1)

## PARTS:

- [CR2032 Lithium Battery](#) (1)

## Step 1 — Replace Battery

- What you will need.
- ① Key Fob from a 2007 era VW
- ① 2032 coin cell Battery
- ① Small flat head screwdriver

## Step 2 — Remove Emergency Key

- Press button to remove plastic emergency key.

### Step 3 — Remove chrome top section.

- Push it sideways from the opposite side from the button.

### Step 4 — Pry case open.

- With chrome end cap off this should be pretty easy.

## Step 5 — Remove old battery

- Use small screwdriver to lift out the old battery.

## Step 6 — Pop in New Battery

- Battery should slide in easily.

## Step 7 — Test Fob

- Pressing the unlock button should flash an LED

## Step 8 — Reassemble The Fob

- Put everything back together in the reverse order of taking it apart.

To reassemble your device, follow these instructions in reverse order.
