

# Verizon Ellipsis 10 Camera Replacement

How to remove and replace the Verizon Ellipsis 10 camera.

Written By: Mary Duran

## INTRODUCTION

This guide is designed to provide you with simple steps to remove and replace the Verizon Ellipsis 10 Camera.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [Tweezers](#) (1)
- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Back Cover

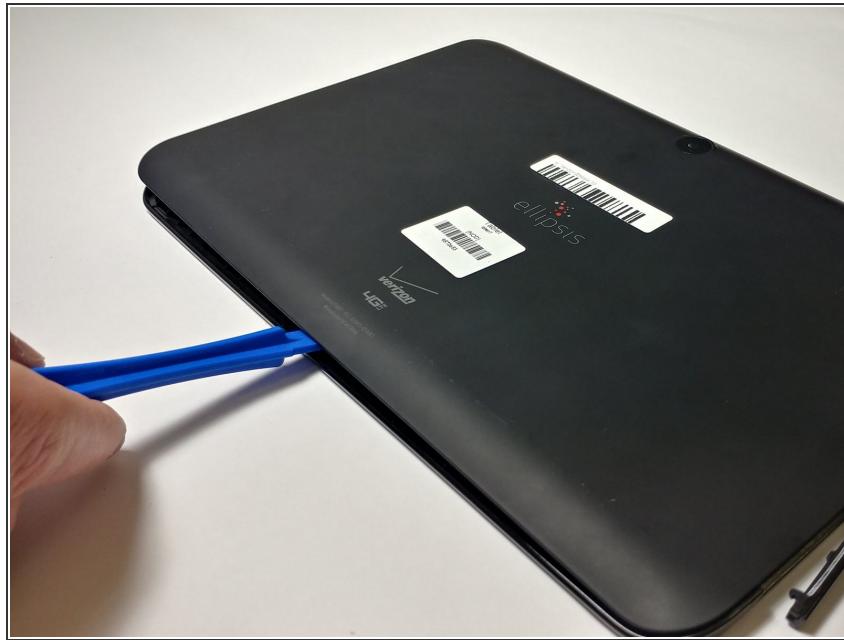

- Open the SD/SIM card cover to start prying off the back cover.

## Step 2

- Start using the iFixit Opening Tool in the SD/SIM area to release the clips holding the back panel on.

## Step 3

- Follow along the edge of the device to undo all of the retaining clips.

## Step 4

- Once all the clips are undone, the back panel should come off with little effort.

## Step 5 — Battery

- Remove the bottom piece of tape securing the battery making sure you are not peeling up anything else in the process.

## Step 6

- Remove the top piece of tape. You can use the iFixit opening tool to get a hold on it.

## Step 7

- Once you have a hold on the tape, carefully remove it making sure you aren't damaging the battery in the process.

## Step 8

- Unplug the battery power connector by sliding the white plastic plug down away from the board.

## Step 9

- The battery should be free to come out of the device. Make sure not to bend or damage the battery.

## Step 10 — Camera

- Remove 4 M1.5 screws holding in the labeled LTE module.

## Step 11

- Use a nylon spudger to pry up the module.
- *(i)* It's held in with some clips so there will be a little bit of resistance.

## Step 12

- Remove the 4 M1.5 screws holding in the labeled auxiliary LTE/GPS module.
- The module should come up with a little resistance.

## Step 13

- Use a pair of tweezers to lift up the front camera off its locating post.

## Step 14

- Remove the non-conductive tape covering the camera ribbon cable.
- You may need to remove the white antenna cable to remove the tape.

## Step 15

- Carefully unplug the ribbon cable from the motherboard.

## Step 16

- Peel up the ribbon cable carefully as it is glued to the device.
- After having peeled up the cable, the cameras should be free to come out of the device.

To reassemble your device, follow these instructions in reverse order.
