Step 1 — Micro USB Charging Port

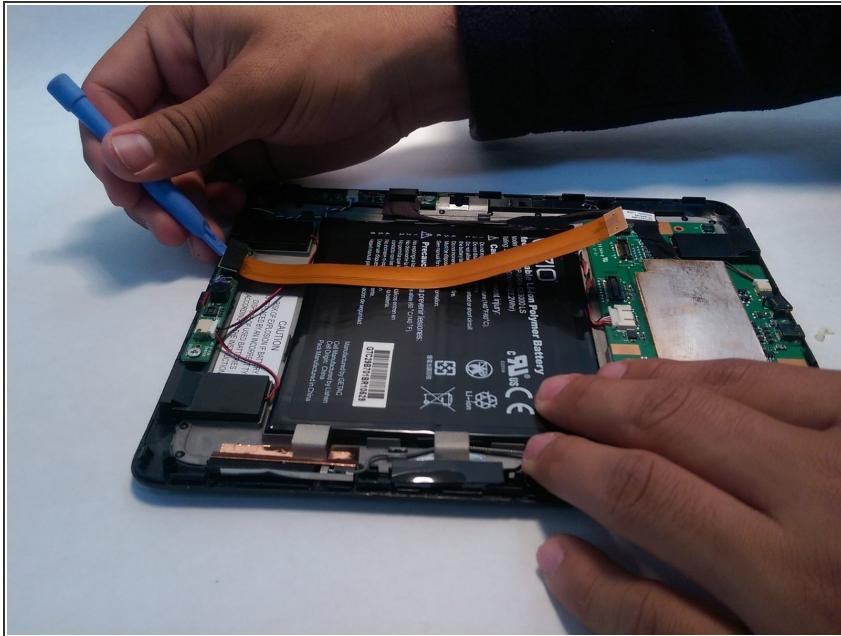

- Begin by using the plastic opening tool to take off the back of the tablet.
- Starting from the sides can make the process easier.

Step 2

- Use the plastic opening tool to disconnect the LCD screen.

Step 3

- Use the plastic opening tool to disconnect the camera.

Step 4

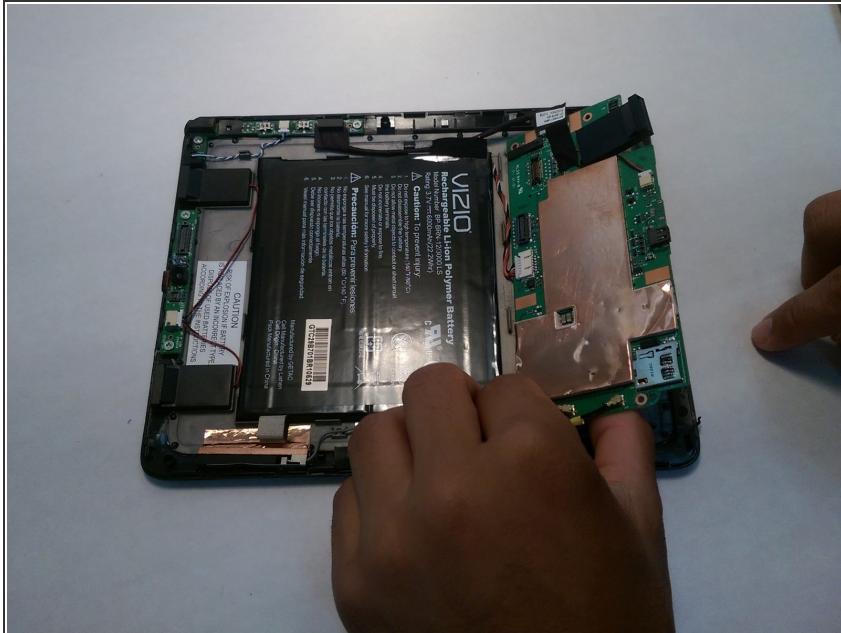

- Use the plastic opening tool to disconnect both of the volume buttons.

Step 5

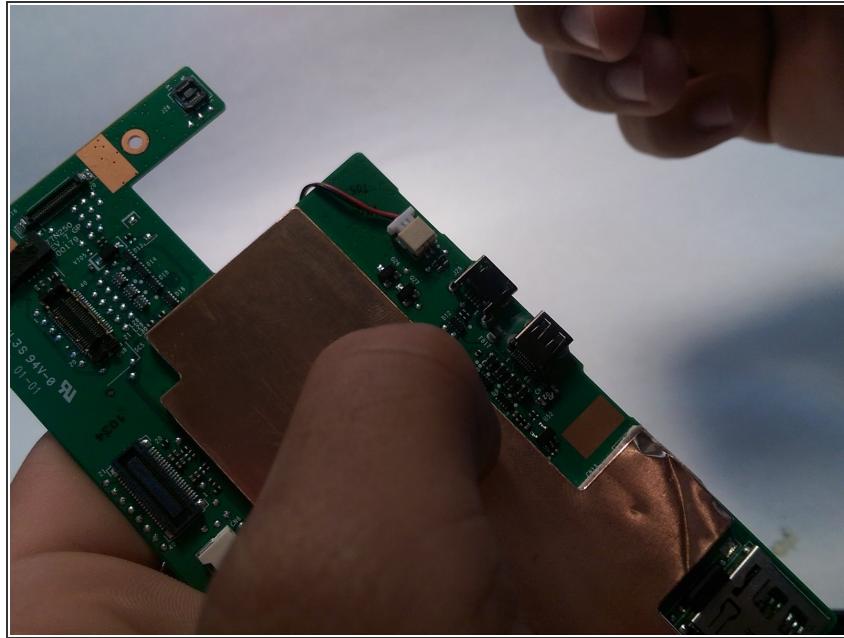

- Then, remove all four of the 2.3 mm Phillips screws.

Step 6

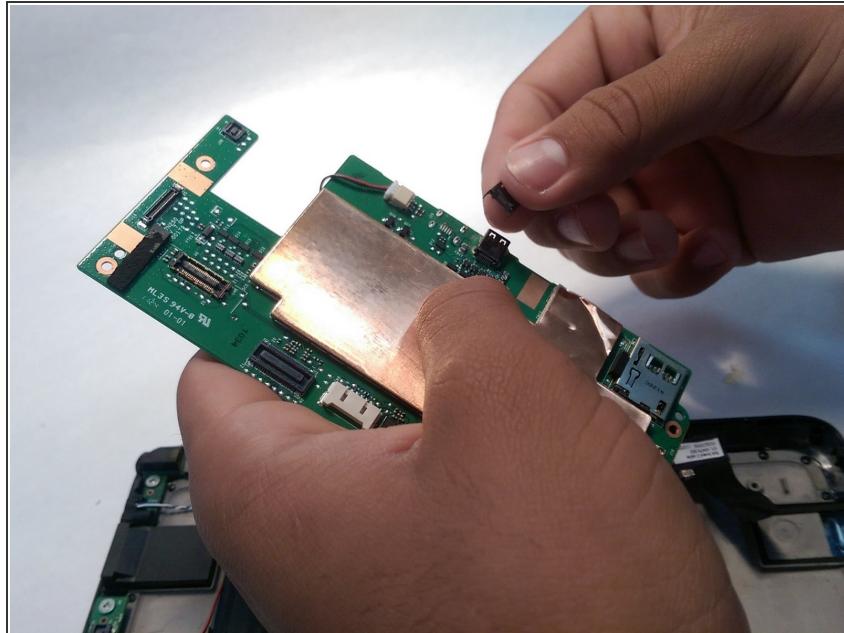

- Remove the circuit board from the platform.

Step 7

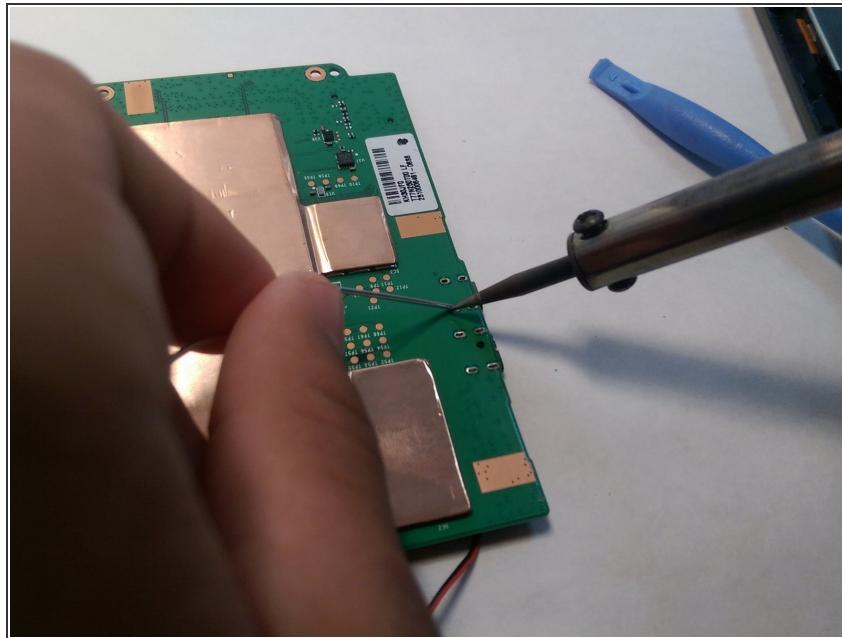

- Remove the USB port from the circuit board.

Step 8

- Insert the new USB port onto the circuit board.

Step 9

- Lastly, fuse the USB port back onto the circuit board.

To reassemble your device, follow these instructions in reverse order.
