

Vornado Duo Power Button Replacement

In this replacement guide, step by step instructions show how to approach replacing the Power Button of the Vornado Duo.

Written By: Kyle Devoe

**TOOLS:**

- [Phillips #2 Screwdriver](#) (1)

**PARTS:**

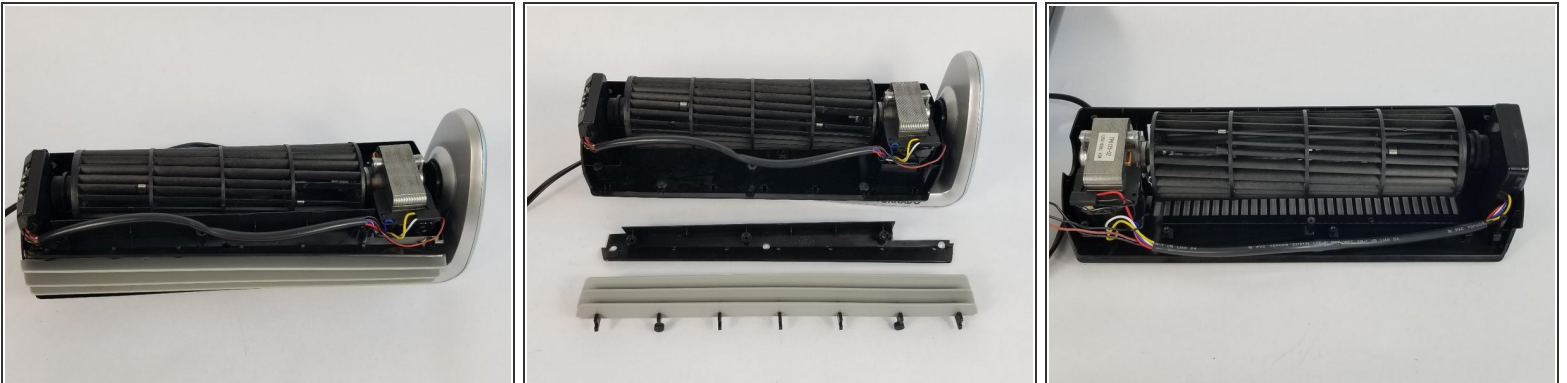

- [Replacement Power Button](#) (1)

Step 1 — Power Button

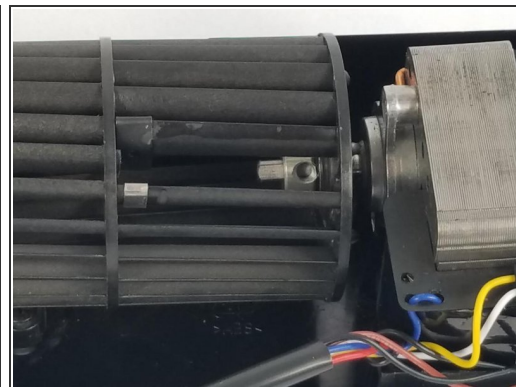

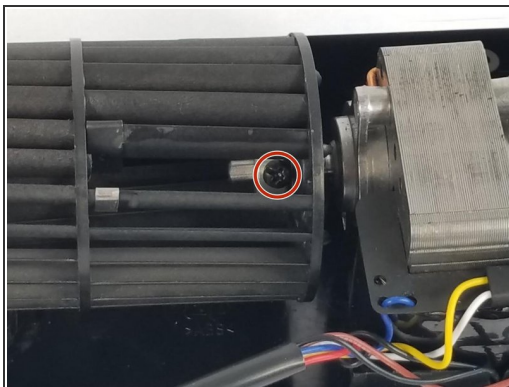

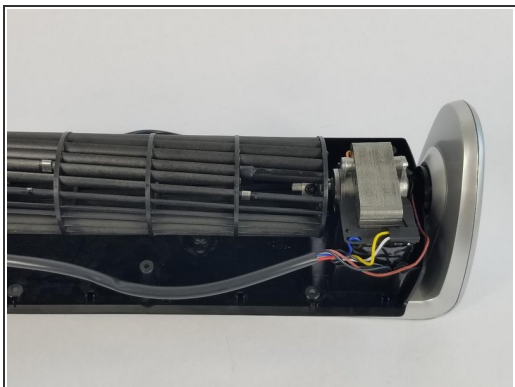

- Start off by using a Philips #2 screwdriver to remove all 8 10mm exterior screws on the rear of the device.

Step 2

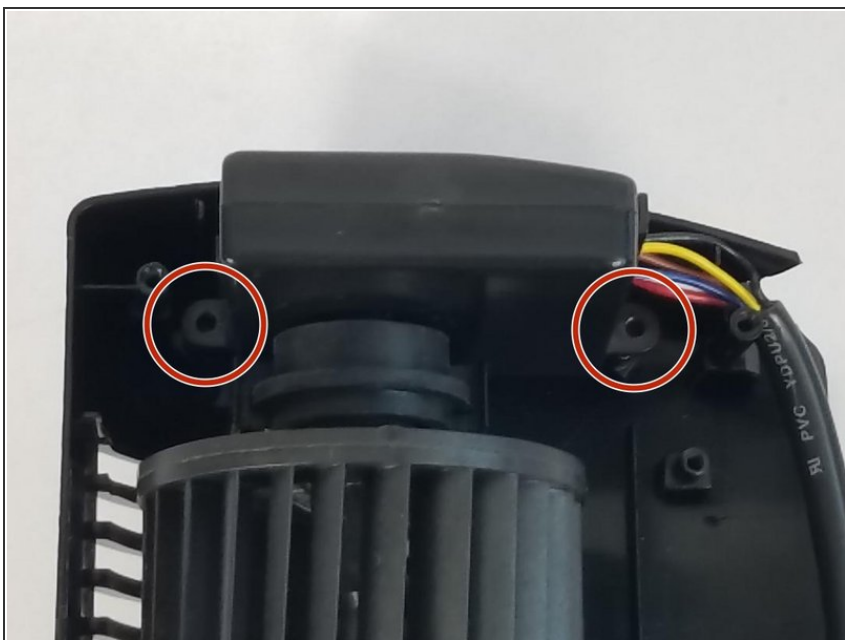

- After screws have been removed, open fan up. Inside remove the black and silver directional fins.

Step 3

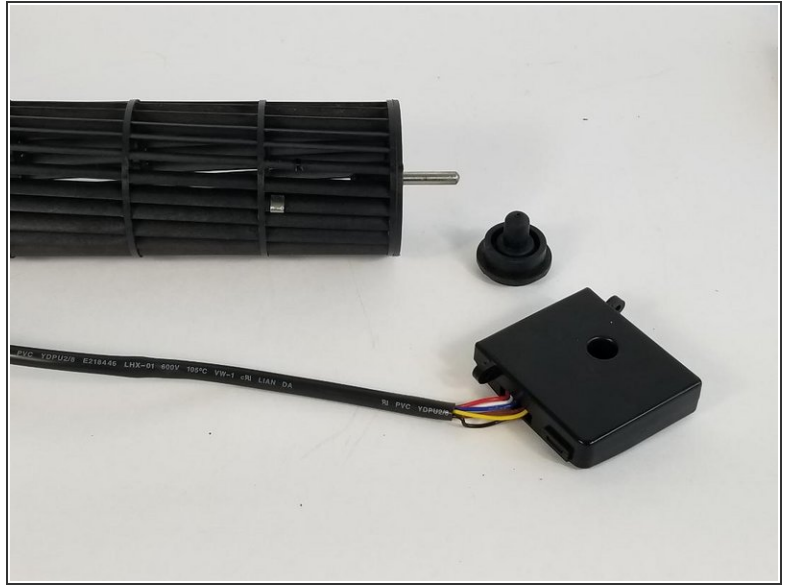

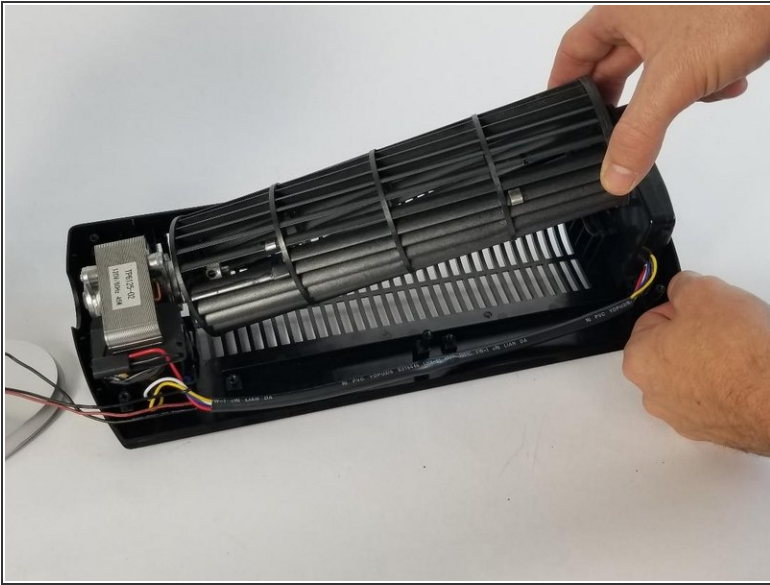

- Remove the black 5mm screw inside of the fan blade cylinder.

Step 4

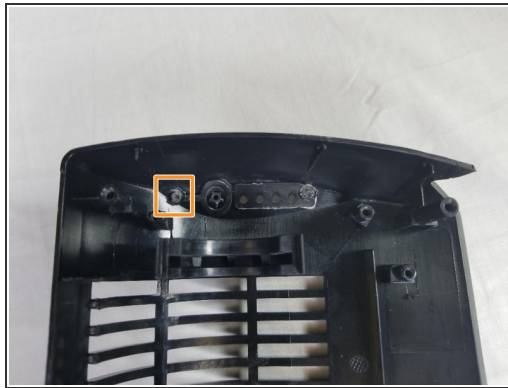

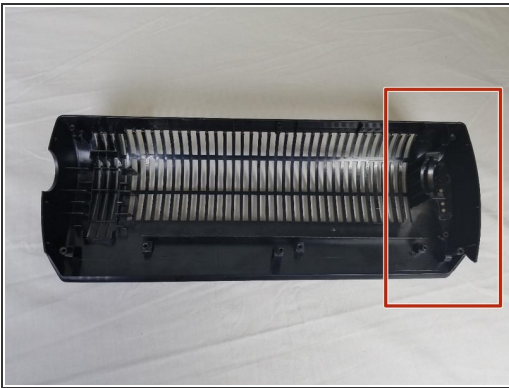

- Find and locate the 10 mm screws on both sides of the circuit board enclosure. Remove both screws.

Step 5

- Take out the fan cylinder and the circuit board enclosure.

Step 6

- Look inside the frontal shell of the fan and locate power button.
- Remove by gently pulling button off notch and replace with new power button.

To reassemble your device, follow these instructions in reverse order.
