## INTRODUCTION

In this guide, you will learn how to remove the rumble motors located in the triggers. This task requires you to fully disassemble the triggers on the controller.

### TOOLS:

- [Soldering Iron](#) (1)
- [Spudger](#) (1)
- [T6 Torx Screwdriver](#) (1)
- [T8 Torx Screwdriver](#) (1)
- [Tweezers](#) (1)

### PARTS:

- [Trigger Rumble Motor\(s\)](#) (1)

## Step 1 — Battery Pack

- Remove the battery pack cover.
- Remove batteries.

## Step 2 — Side Handles

 We recommend using a nylon spudger for this step. A metal spudger is shown.

- Grip the controller firmly to remove the side handles, wedging a spudger into the seam between the front and handle plates.
- Pry the side plate away from the front plate by moving the spudger back and forth. You will need to do this all the way around the side plate's seam.

## Step 3 — Screws

- i There is a hidden screw located in the middle of the controller behind the label.
- Use a screwdriver and punch a hole directly in the center of the label.
- i You may also lift the label if you do not want to puncture it.
- Remove the five 10mm screws located on the back of the controller using the T8 Security Torx Screwdriver.

## Step 4 — Backplate

- Remove the backplate.

## Step 5 — Faceplate

- Remove the faceplate.

## Step 6 — Top Motherboard

 You may let the rumble motors hang freely out of their sockets.

- De-solder the soldered joints while holding the red and black wires down on the top motherboard.
- De-solder the black and gray wires that are attached to the top motherboard.
- Remove the rumble motors and set them aside.

 Be careful while using the soldering iron not to damage other components or hurt yourself.

## Step 7

- Unscrew the two 7mm T6 screws located near the rumble motor sockets.

## Step 8

- Firmly grip sides of motherboard near the middle.
- Lift upwards while slightly wiggling the motherboard forward and backward.
- ⓘ Lifting the motherboard will require some force.

## Step 9 — Trigger Rumble Motors

- Remove the yellow tape holding the wires in place on the front of the controller.

## Step 10

- Unscrew the two 7mm T6 Hex screws located on underside the triggers.

## Step 11

- Remove the trigger covers.

## Step 12

- ① Desolder the wires from the motherboard.
- Remove the rumble motors from its socket and pull the wire with it.

To reassemble your device, follow these instructions in reverse order.
