

# Xiaomi Mi Power Bank 10400mAh Teardown

Simple fix for a dead, rattling battery pack.

Written By: Martin Hampton

## INTRODUCTION

If you Xiaomi battery pack rattles then one of the battery strips may break off from the board. This is a simple fix to re attach.

### TOOLS:

- Essential Electronics Toolkit (1)

## Step 1 — Xiaomi Mi Power Bank 10400mAh Teardown

- This is the model

## Step 2

- Remove it with a knife. Be really careful not to cut yourself
- The top is attached with double sided tape.

## Step 3

- Remove 4 screws, and push the battery and circuit board out.
- You need to resolder the battery to the PCB.
- To keep the battery tight I used a piece of double sided foam tape on on of the edge cells
