

ZD-N Plus Wireless Controller Left Joystick Replacement

This guide will explain how to remove the left joystick on your ZD-N Plus Wireless Controller.

Written By: Stacie Schmidt

INTRODUCTION

In this guide, steps will be provided to remove and replace the left joystick on your ZD-N Plus Wireless Controller. The joystick might have to be replaced if the joystick is drifting, or if the joystick is not responding to your touch.

TOOLS:

- [JIS #00 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Back Panel

- Remove the seven 12mm JIS #00 screws that hold the back panel in place.

Step 2

- Lift up on the back panel of the ZD-N Plus to remove it from the rest of the controller.

Step 3 — Battery

- Use an opening tool to pry the battery from its original position.
- ⓘ The battery is glued on, so this may take some effort.

Step 4

- Use an opening tool to pry the connector away from the two metallic prongs.
- ⓘ The parts are built to stay together, so this may take some effort.
- ⚠ Be careful to not warp the prongs in the process.

Step 5

- Remove the battery from the controller.

Step 6 — Rumble Motor

- Remove the electrical connector attaching each rumble motor to the controller.
- Lift up on the circular section of the rumble to remove it from the controller.

Step 7 — Motherboard

- Remove the three 1.2mm JIS #00 screws that hold the motherboard in place.

Step 8

- Lift the motherboard out of the controller.

Step 9 — Left Joystick

- Pull up on the left joystick to remove it from the motherboard. The plastic piece will unclip easily.

To reassemble your device, follow these instructions in reverse order.
