

# Zeki Droid Tablet Front Screen Replacement

This guide will help you to fix a crack screen so you can see your homepage and apps clearly.

Written By: Kyla

# INTRODUCTION

In this guide we will be taking the components apart to reach the screen. When working with the screen be careful for broken glass.

---

## TOOLS:

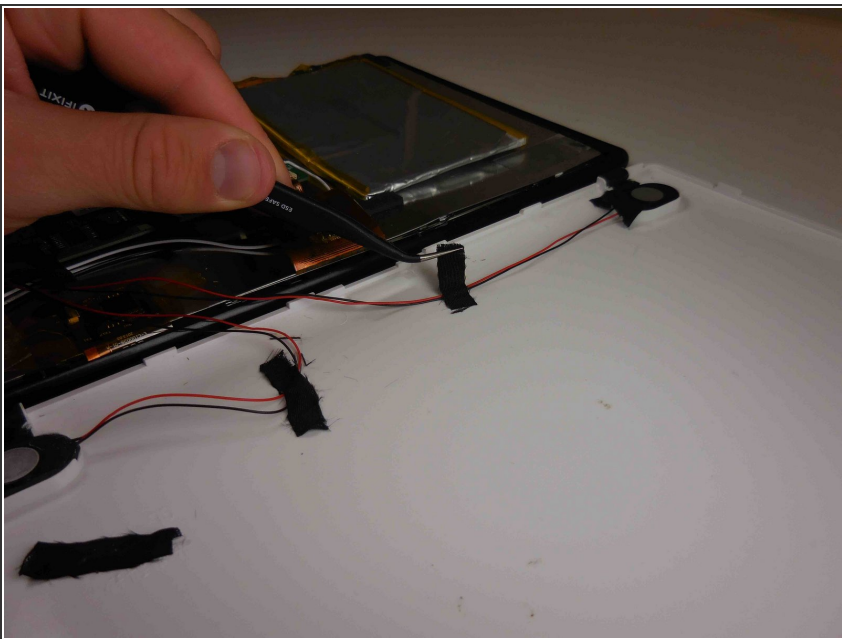

- [Tweezers](#) (1)
  - [Spudger](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Phillips #000 Screwdriver](#) (1)
-

## Step 1 — Back Casing

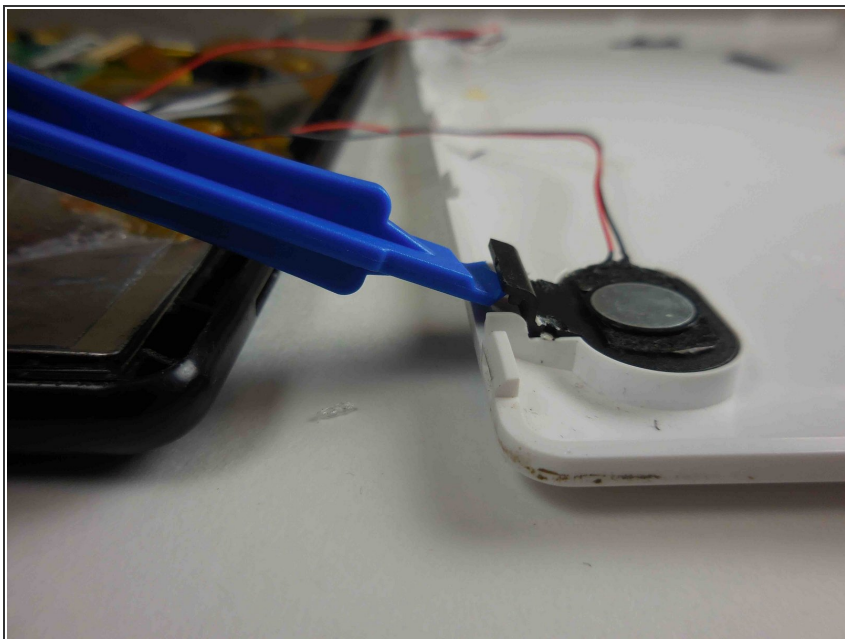

- Remove the back casing by slowly popping each tab out with a plastic opening tool.

## Step 2

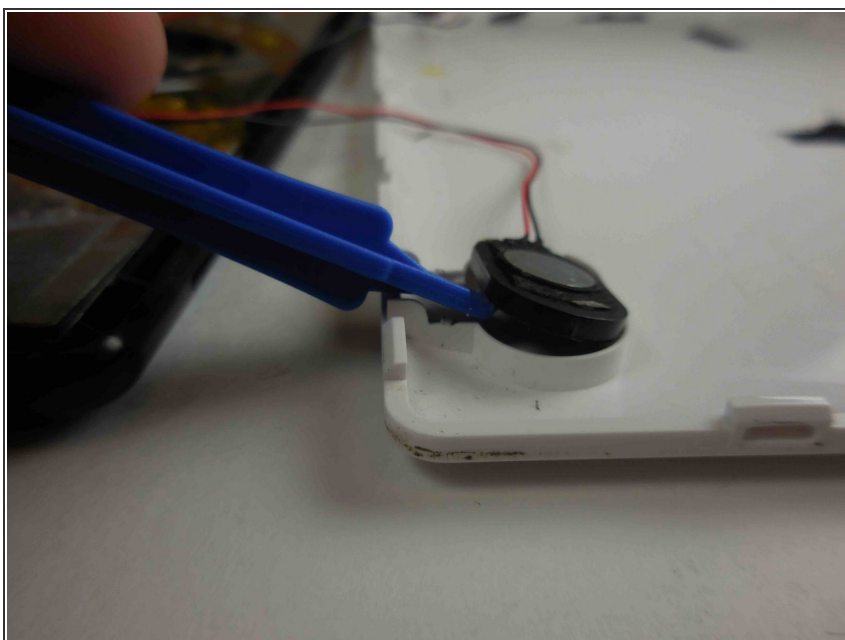

- Carefully remove the tapes one by one from the connecting wires with tweezers.

## Step 3

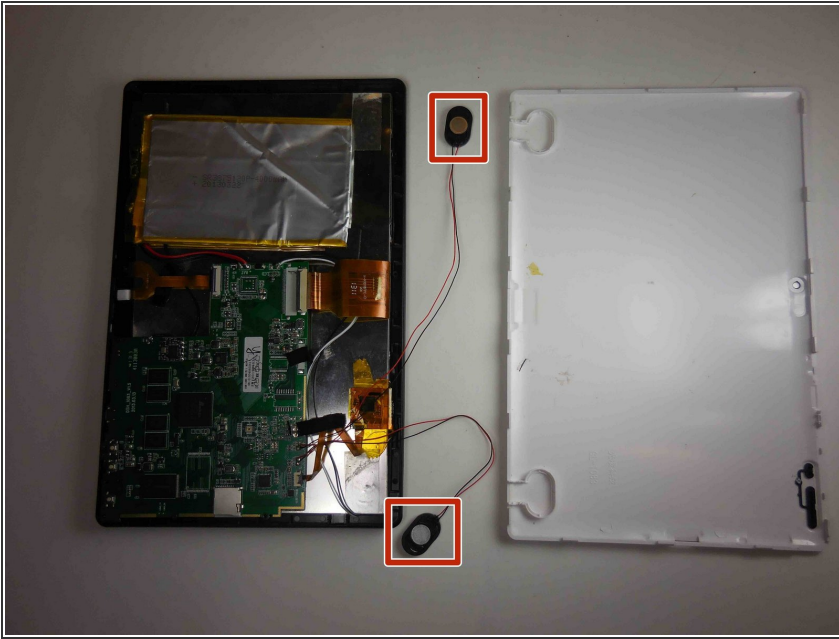

- Carefully remove the black clips from both sides of the casing with a plastic opening tool.
- ⓘ The clips should pop off separate from the speakers.

## Step 4

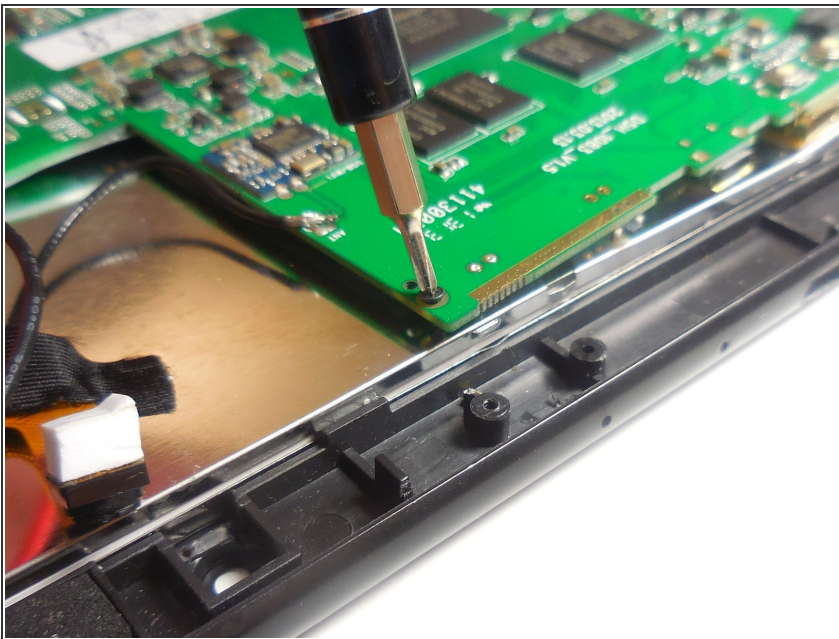

- Carefully remove the speakers from the casing.
- ⚠ Do not tug on the speakers because they are connected to fragile wires.

## Step 5

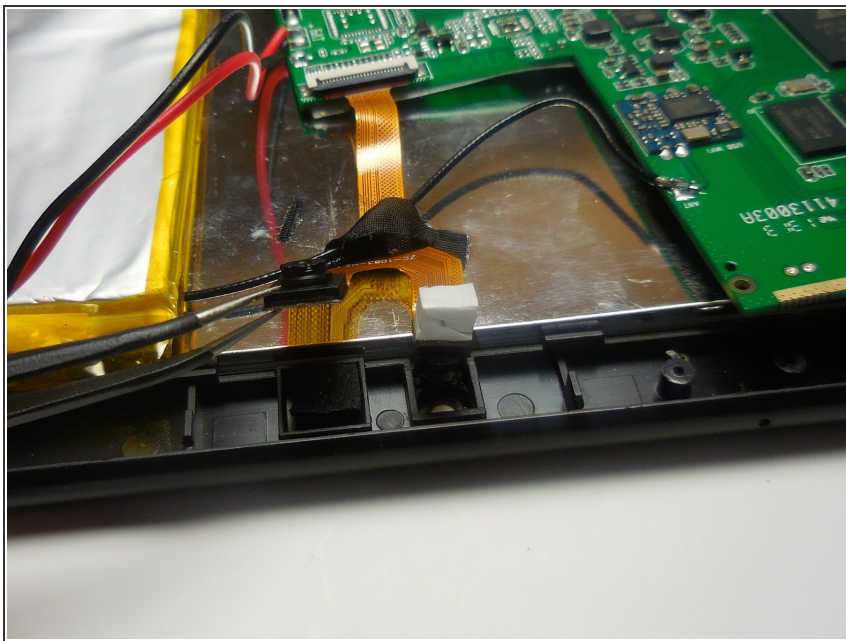

- Carefully pull the speakers away from the back casing.

## Step 6 — Front Screen

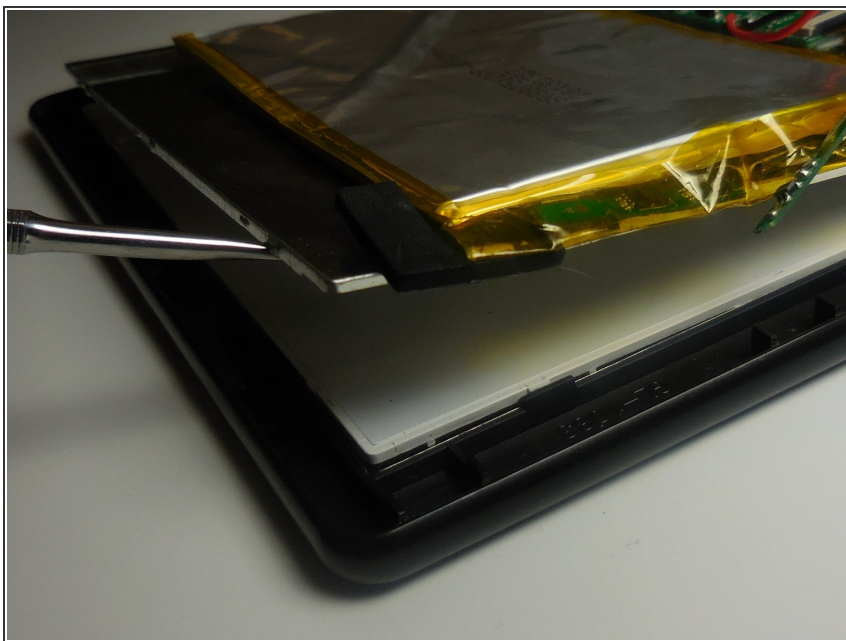

- Unscrew all four screws around the motherboard, this unattaches the board from the framing.

## Step 7

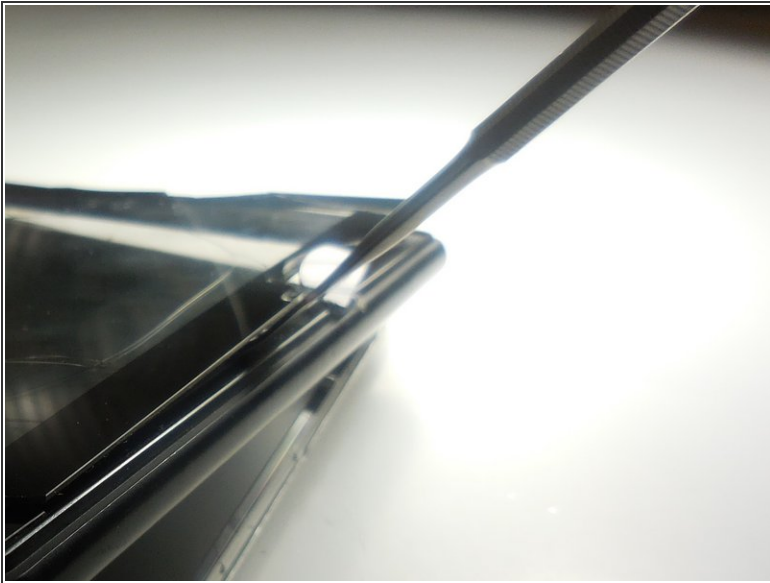

- With tweezers, lift the camera and flash component from their fittings.

## Step 8

- Slowly lift the metal framing to reach the components at the front of the device.
- ⚠ Do not pull the framing completely off. There is a zift connector that hold it in place at one end.

## Step 9

- Pop out the screen pushing it forward.

To reassemble your device, follow these instructions in reverse order.
