INTRODUCTION

Remove the back cover of the Zoomer Jurassic World Indominus Rex to get access to the motherboard, battery and the mechanical systems of the toy.

TOOLS:

- Heavy-Duty Spudger (1)
- Phillips #1 Screwdriver (1)

Step 1 — Back Cover

i Turn off and unplug Zoomer Jurassic World Indominus Rex from any power source before doing replacements.

- Remove all eight (8) 9.3mm Phillips screws using Phillips #1 screwdriver.

Step 2

- Pry apart the back cover of the Jurassic Indominus Rex and the rest of the body using a spudger.
- ⚠ Do not take out the back cover immediately as it is still attached to the motherboard by a wire.

Step 3

- Disconnect the orange wire that connects the motherboard and the back cover.
- Separate the back cover and the rest of the Zoomer Jurassic World Indominus Rex.
- *(i)* Gently press the tab on the side of the orange connector if you are having trouble disconnecting the wire.

To reassemble your device, follow these instructions in reverse order.
