

# dreamGEAR Quad Dock Pro Power Board Replacement

How to replace the Power Board that charges your controllers.

Written By: Jacob

## INTRODUCTION

The Power Board is the board that charges the PS Move controllers. This is how you replace it.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

## Step 1 — Prerequisite Guide to Accessing Interior

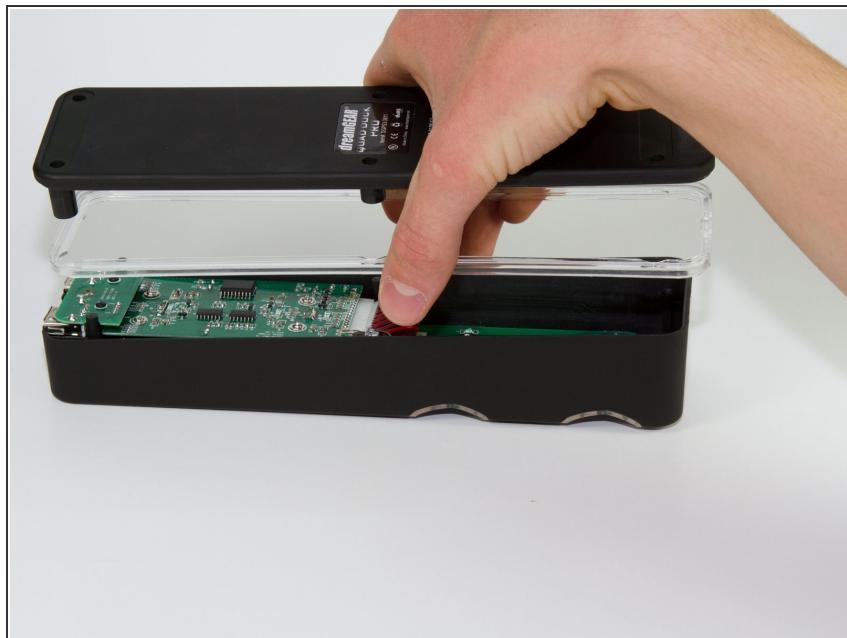

- Remove the rubber foot pads on the bottom of the device using a plastic opening tool.

## Step 2

- Remove the six 2 mm PH0 screws on the bottom of the device.  
*(i)* Four of those screws are located under the foot pads.

## Step 3

- Gently remove the bottom of the device.

## Step 4 — Mother Board

- Remove the six screws holding the motherboard in. Two are 2mm PH0 screws (circled in orange), four are 1.8 mm J1 screws (circled in red).

## Step 5

- Gently pick up the mother board
- ⚠ Pick the mother board straight up or you may risk damaging the mini-USB charging ports.

## Step 6

- Use a plastic opening tool or similar tool to gently pry the power ribbon cord out of its port.

## Step 7 — Power Board

- Remove the four 1.8 mm PH0 screws that are holding the board in.
- ⓘ When you remove these screws, the plastic cups inside the PS Move stations will fall out.

## Step 8

- Pick up the board.

 Pick the board straight up, or you risk damaging the charging ports.

## Step 9

- Using a plastic opening tool or a similar tool, gently pry the power ribbon cord out of its port.

To reassemble your device, follow these instructions in reverse order.
