INTRODUCTION

This guide will show you how to replace the battery on the iHealth Edge. You must take the device and remove the two piece that are stuck together using a blow dryer. This will expose the inside of the device to see screen. This is where we will begin to learn how to replace the battery.

🔧 TOOLS:

- Hair Dryer (1)
- iFixit Opening Tools (1)
- Soldering Iron (1)

This document was generated on 2019-09-24 12:14:51 PM (MST).

Step 1 — Battery

- Lightly heat device with hair dryer for 15 seconds to soften adhesive.

Step 2
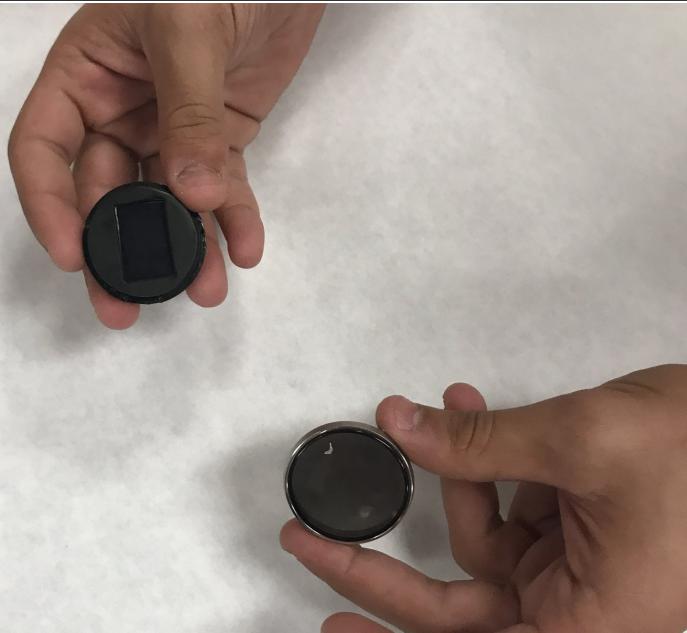

- After heating adhesive, firmly pry apart the two halves.

Step 3

- Remove polymer cover that is protecting the mother board, it should just come out when two halves are separated.

Step 4
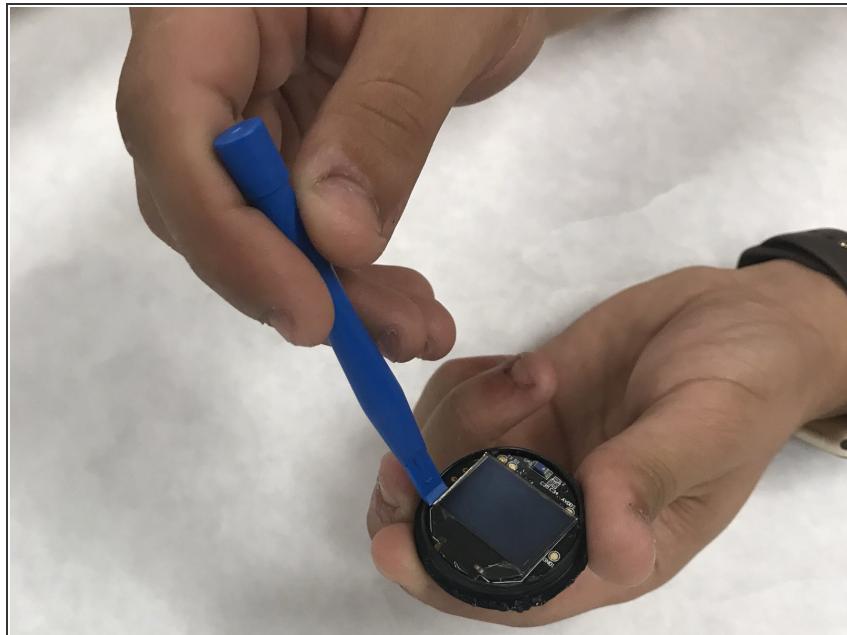

- Use a spudger or plastic opening tool to assist the removal of the motherboard. Pry up on two tabs and the mother board will pop out.

Step 5
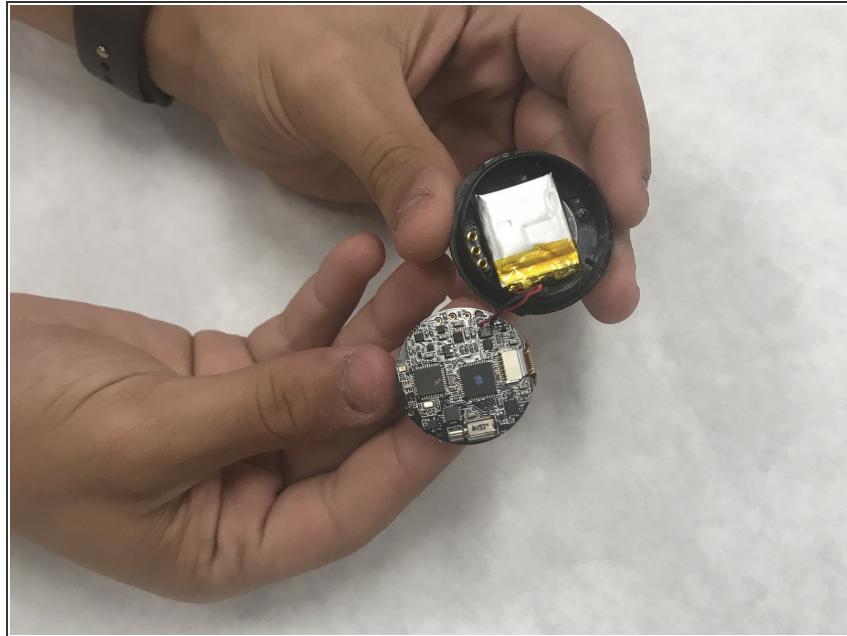

- This shows the mother board and battery out and exposed.

Step 6
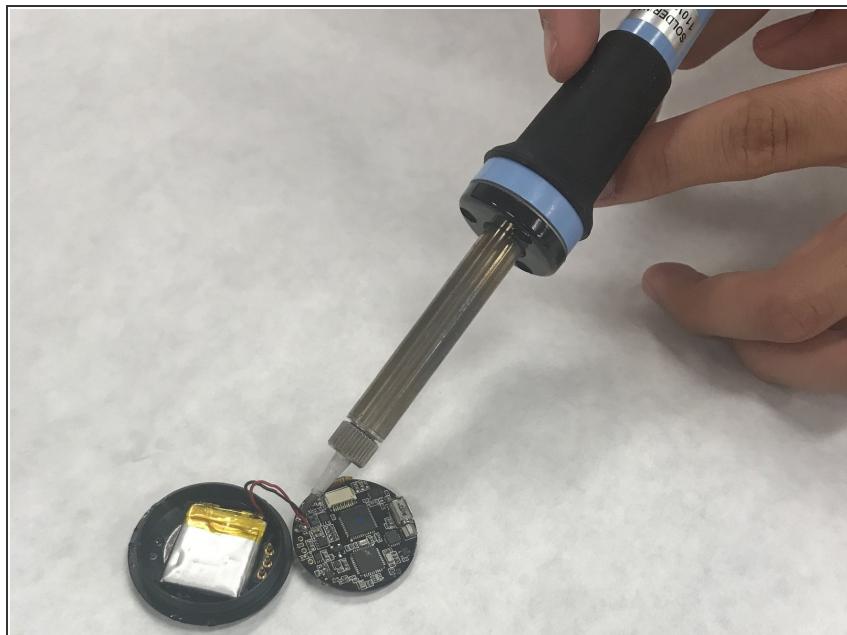

- You must remove the solder from two wires from the motherboard that are connected to the battery.

To reassemble your device, follow these instructions in reverse order.
