

# iMac Intel 21.5" EMC 2544 Logic Board Assembly Replacement

Prereq only.

Written By: Sam Goldheart

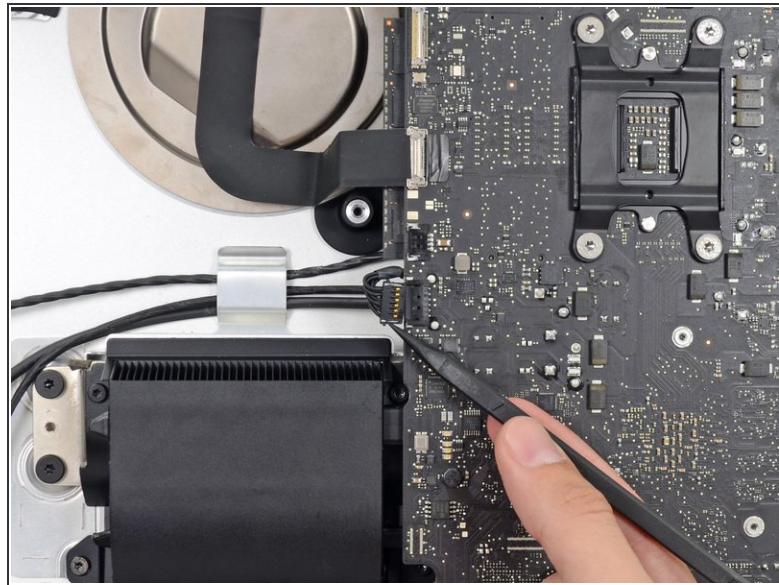

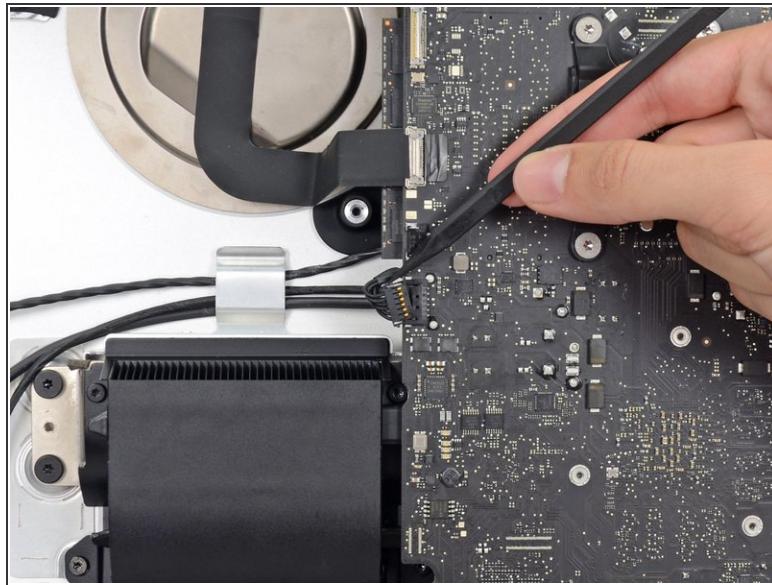

# INTRODUCTION

Prereq only.

## TOOLS:

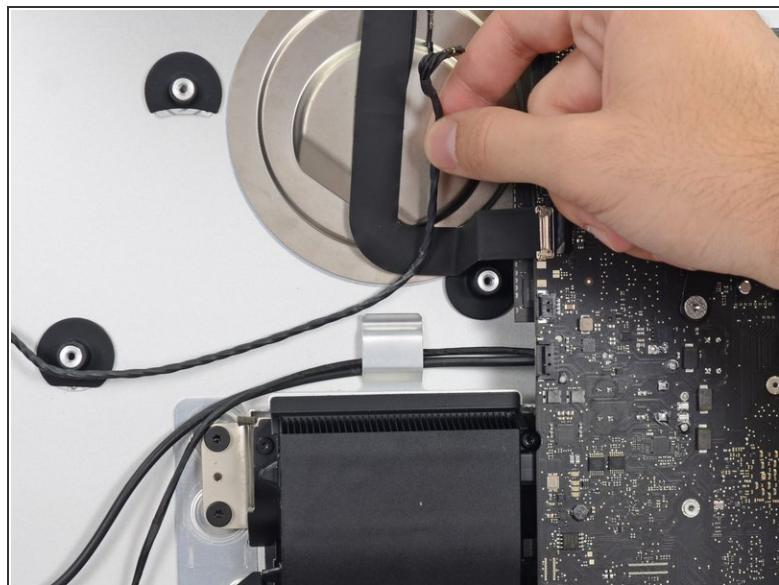

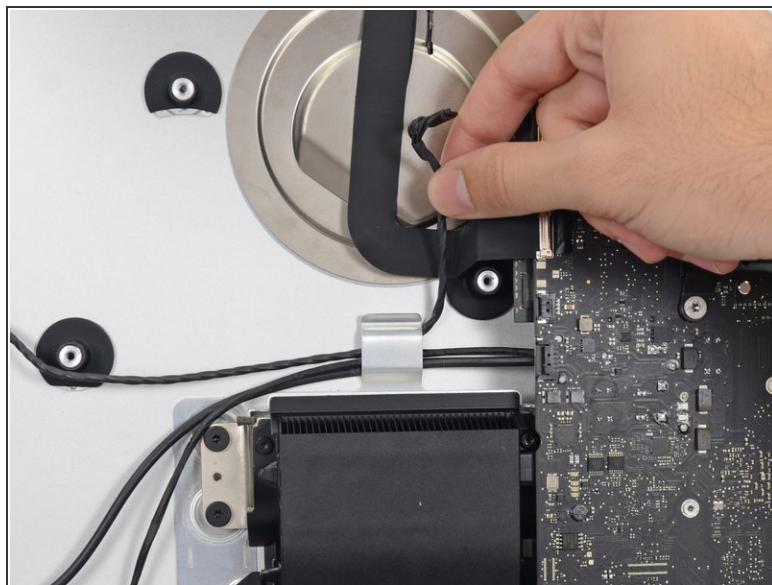

- [T10 Torx Screwdriver](#) (1)
- [T8 Torx Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Logic Board Assembly

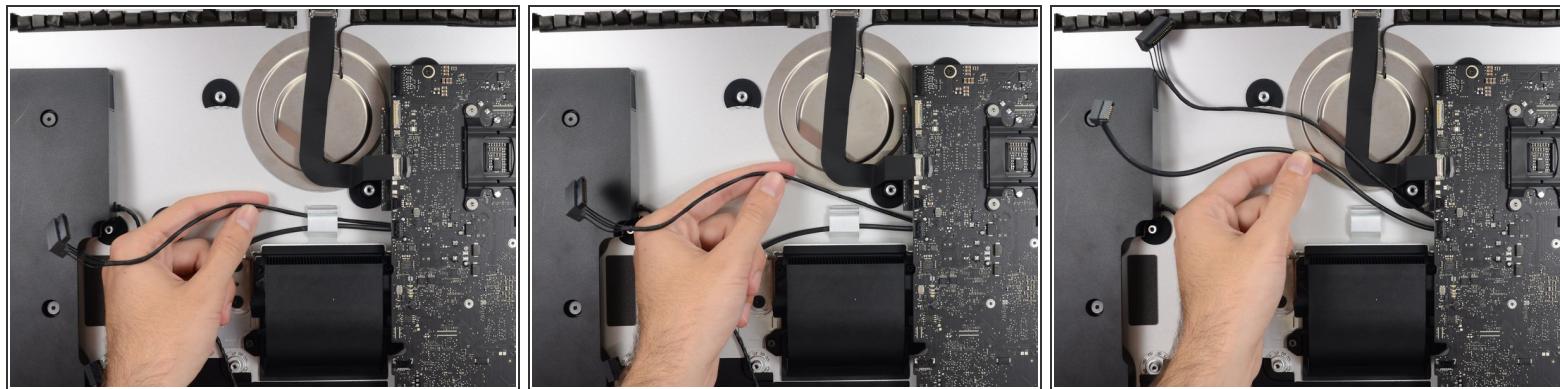

- Push on each side of the left speaker cable connector with the tip of a spudger and gently "walk" it out of its socket.

## Step 2

- De-route the left speaker cable by pulling it straight up out of the retaining clip in the back of the rear enclosure.

## Step 3

- In a similar fashion as the previous step, de-route the SATA data and power cables up out of the retaining clip.

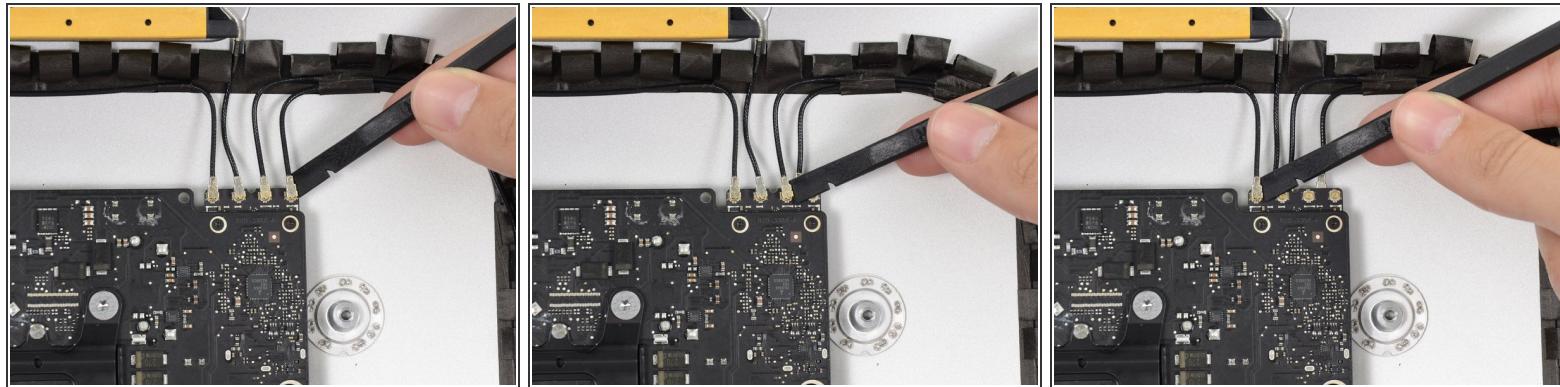

## Step 4

- Use the flat edge of a spudger to flip up the metal retaining bracket on the iSight camera cable connector.
- Pull the iSight camera cable straight out of its socket on the logic board.

 This is a delicate connector that can be easily damaged.

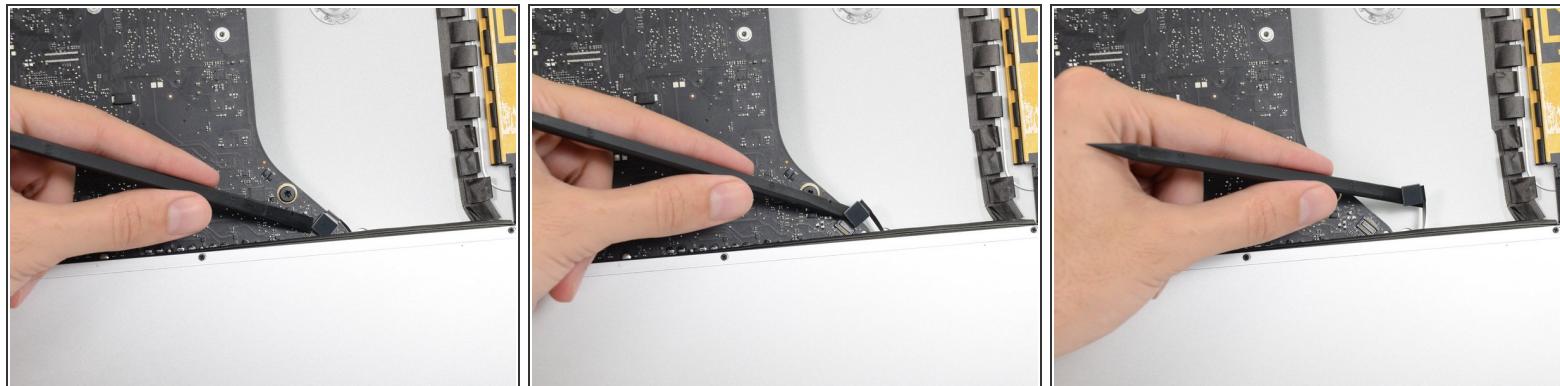

## Step 5

- Use the flat edge of a spudger to disconnect each of the four antenna connectors from the AirPort/Bluetooth card.

 Note the original positions for each connector when reconnecting the cables.

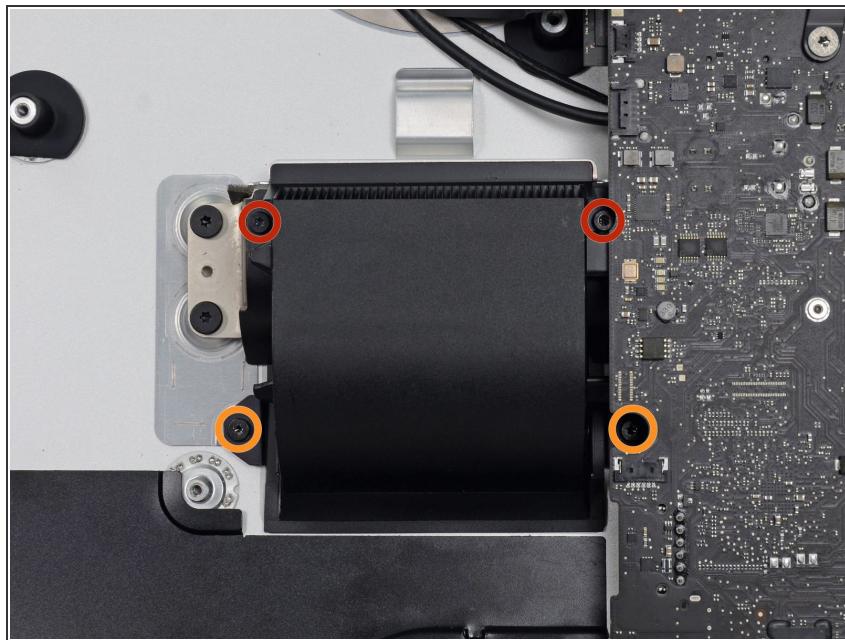

## Step 6

- Use the flat edge of a spudger to pry the headphone jack cable connector from its socket on the logic board.

 Push the cable slightly to the right.

## Step 7

- Remove the following screws securing the exhaust duct to the rear enclosure:
  - Two 6.3 mm T8 screws
  - Two 4.7 mm T8 screws

## Step 8

- Remove the four 7.2 mm T10 screws securing the logic board to the rear enclosure.

## Step 9

- Tilt the top of the logic board away from the rear enclosure.
- Lift the logic board straight up and out of the iMac.

**⚠** Be careful not to snag the board on any of the rear case's screw posts.

**ⓘ** The I/O boards at the bottom of the logic board will be the greatest challenge. It is recommended to pull gently to avoid any damage.

**⚡** During reassembly of the logic board, pay attention to the position of the I/O connectors. When the board is back in the case, insert a USB or Thunderbolt cable into one of the connectors to align it perfectly.

To reassemble your device, follow these instructions in reverse order.
