

iMac Intel 21.5" EMC 2805 Fan Replacement

Prereq for removing fan after the hard drive brackets.

Written By: Walter Galan

INTRODUCTION

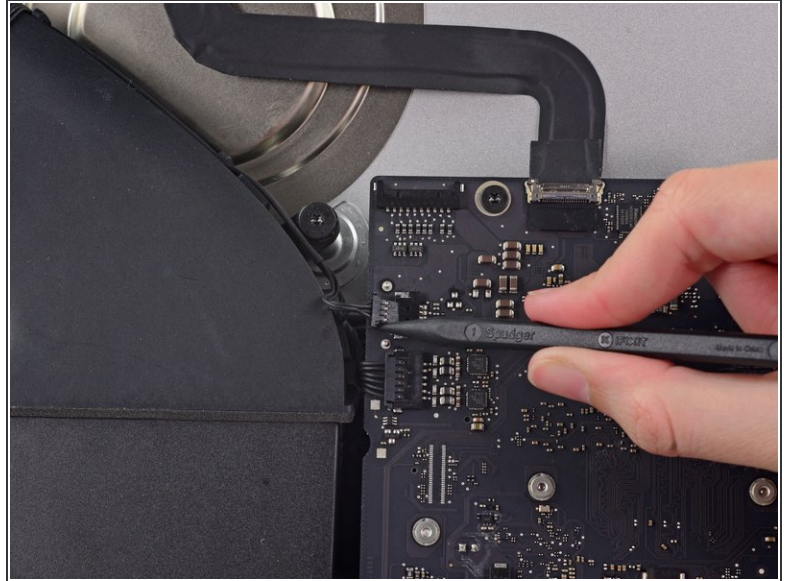

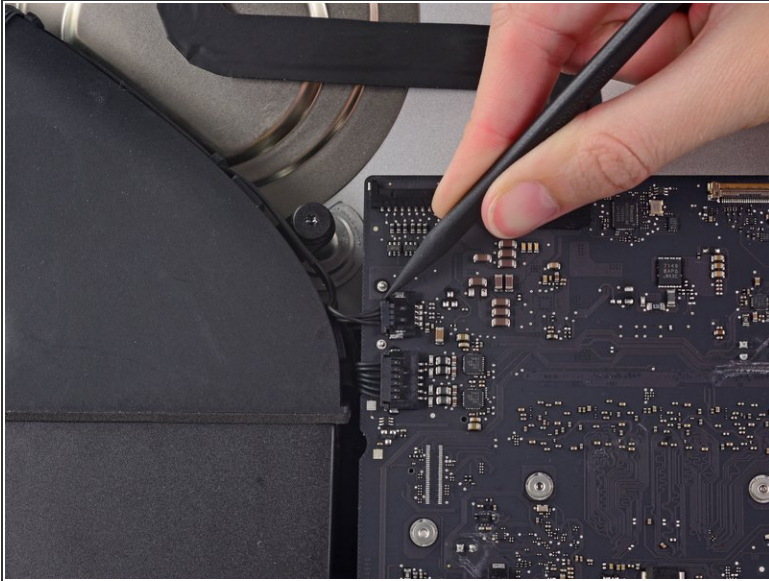

Prereq for removing fan after the hard drive brackets.

TOOLS:

- [Spudger](#) (1)
 - [T10 Torx Screwdriver](#) (1)
-

Step 1 — Fan

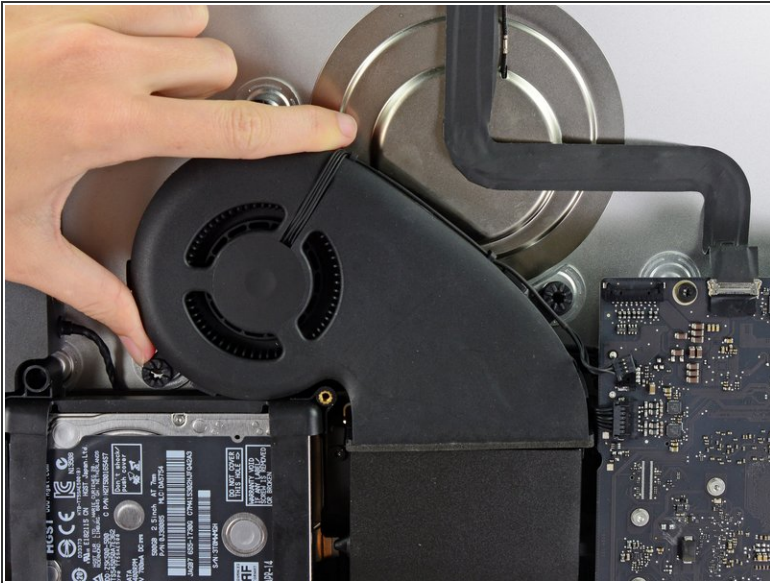

- Use the tip of a spudger to push the fan cable connector out of its socket on the logic board.
- ❗ It is recommended to carefully push on both sides of the connector to *walk* it out of its socket.

Step 2

- Remove the following screws securing the fan to the rear enclosure:
 - Two 12.5 mm T10 screws
 - One 9.9 mm T10 screw

Step 3

- Lift and remove the fan from the iMac.

To reassemble your device, follow these instructions in reverse order.
