INTRODUCTION

Internal Prerequisite.

Step 1 — Hard Drive

- Disconnect the SATA data and power cables by pulling their connectors away from the hard drive.

Step 2

- Disconnect the hard drive thermal sensor cable from the thermal sensor attached to the side of the hard drive.

Step 3

- Compress the plastic hard drive retainer by pushing it toward the bottom edge of the iMac.
- Pull the top edge of the hard drive slightly away from the rear case.

Step 4

- Lift the hard drive off its bottom retaining posts and remove it from the iMac.

To reassemble your device, follow these instructions in reverse order.
