

iMac Intel 27" 2012-2017 Display Hinge Fix

iMac Intel 27" 2012-2017 Display hinge is broken

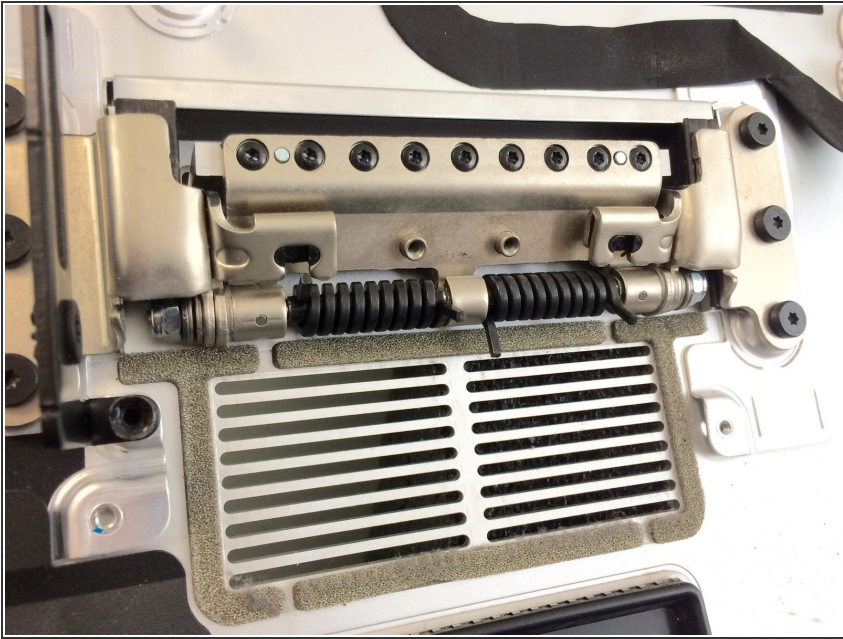

Written By: mail382

INTRODUCTION

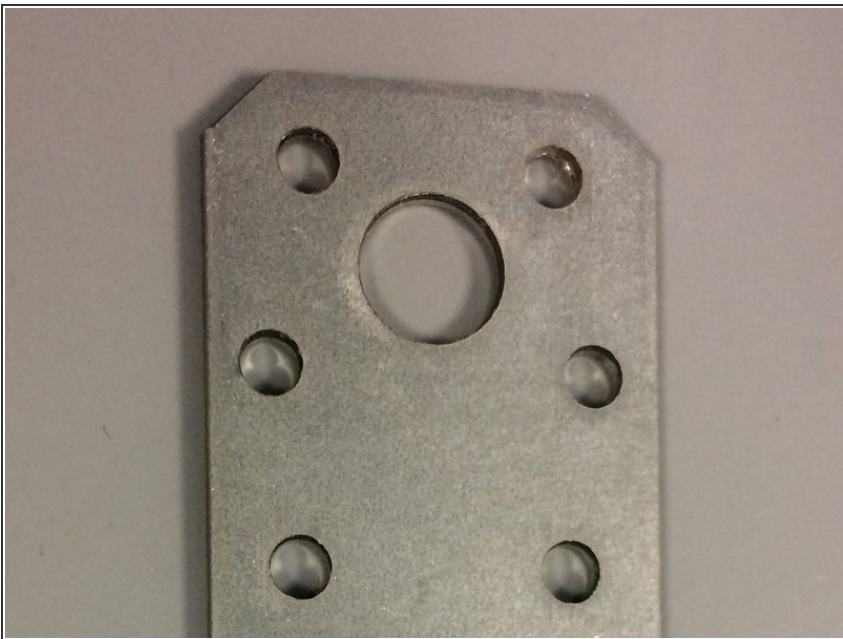

Follow the ifixt instructions to tear down the imac. You will have to dismantle the fan, mainboard and power supply to reach the broken hinges.

Step 1 — Display Hinge Fix

- the hinge

Step 2

- Be creative, keep looking for a metal plate. In my case the holes were in right position. If not you have to drill a hole.

Step 3

- you see the defective broken plastic cap and the screws, below my self made metal plate

Step 4

- Got it ;-)

Arbeite die Schritte in umgekehrter Reihenfolge ab, um dein Gerät wieder zusammenzubauen.
