

# iPad 2 Wi-Fi EMC 2560 LCD Assembly Replacement

Flip the LCD back over to allow steps after Front Panel Assembly.

Written By: Sam Goldheart

## INTRODUCTION

This helps link the Front Panel Assembly guide to any guide that may follow it, it flips the LCD so the user can continue working in the rear case of the iPad.

## Step 1 — LCD Assembly

*(i)* In order to work on the iPad's innards, we need to flip the LCD back out of the case.

- Lift the LCD from its long edge closest to the volume buttons and gently flip it out of the rear case—like turning the page in a book.
- Set the LCD face down on a clean surface. You may want to rest it on a soft cloth to prevent scratches.

To reassemble your device, follow these instructions in reverse order.
