

# iPhone 5s screen Replacement

how to replace a screen, also how to give ride of old screen

Written By: Mike meendez

## INTRODUCTION

For the official iFixit guide, [follow this link](#). This guide has been archived for historical purposes.

### TOOLS:

- Scotch tape (1)

### PARTS:

- Phillips #0 Screwdriver (1)

## Step 1 — hi

- FIRST MUST HAVE IPHONE the one shown is an iphone5

## Step 2 — preparation

- Must be prep before installing like getting tools and a nice clear table

## Step 3

- Must have the right screwdriver and the right screen that goes with the iphone.

## Step 4 — take actions

- unscrew the screws which are located on the bottom of the phone

## Step 5

- take the screen out and find replacement double check everything is in order

## Step 6 — verify all purchases

- make sure its the right screen buy it from the right buyer dont be afraid to go cheap

## Step 7

- carefully put all the parts in the correct spots and make sure all things go well

## Step 8

- Put screw back with the screen in again double check all screws are in and tighten

## Step 9 — make sure all parts are good

- carefully make sure all things are in perfectly and again don't be afraid to double check its always good to double check

## Step 10 — the end

- Enjoy your new phone and be just as happy as this gentlemen in the picture

To reassemble your device, follow these instructions in reverse order.
