

iPod Touch 3rd Generation Power/Volume Controls Replacement

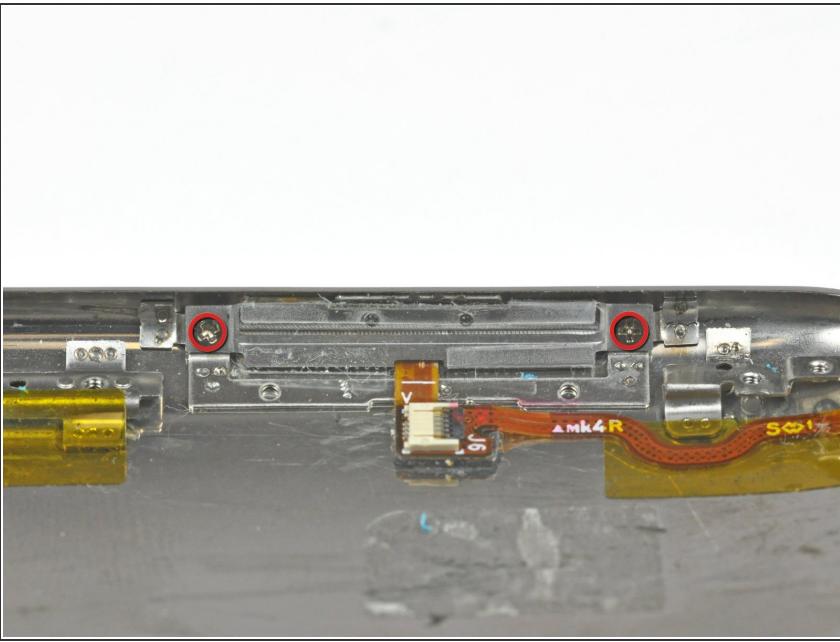

Written By: Andrew Bookholt

 **TOOLS:**

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

Step 1 — Power/Volume Controls

- Remove the two Phillips screws securing the power/volume controls to the rear panel.

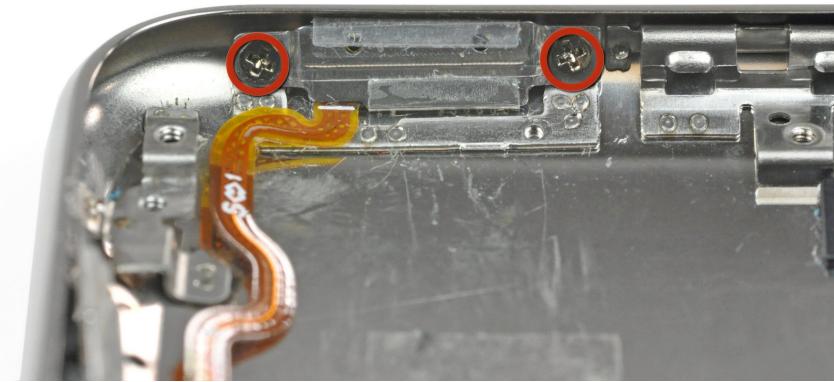

Step 2

- Use the tip of a spudger to remove the yellow kapton tape covering the power/volume control ribbon cable.

Step 3

- Remove the two Phillips screws securing the power/volume controls to the rear panel.
- Lift the power/volume controls out of the rear panel.

To reassemble your device, follow these instructions in reverse order.
