

iPod Touch 4th Generation screen Replacement

how to take off screen off an ipod 4 screen

Written By: Jose A. Loza

INTRODUCTION

[Click here for the most up-to-date guide for this procedure](#). The guide you are currently viewing is retained for historical purposes only.

TOOLS:

- [X-acto Knife heat gun and tiny screw driver set](#) (1)

PARTS:

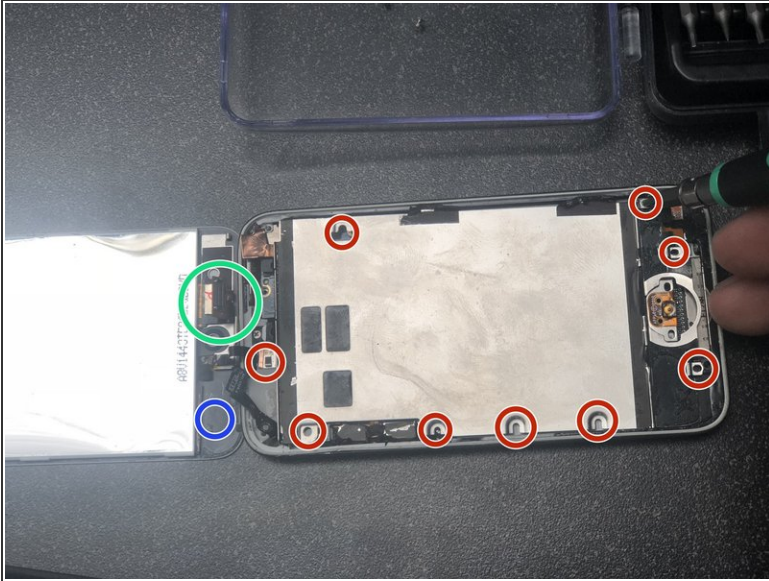

- [iPod 4G Front Panel](#) (1)

Step 1 — how to take off the screen

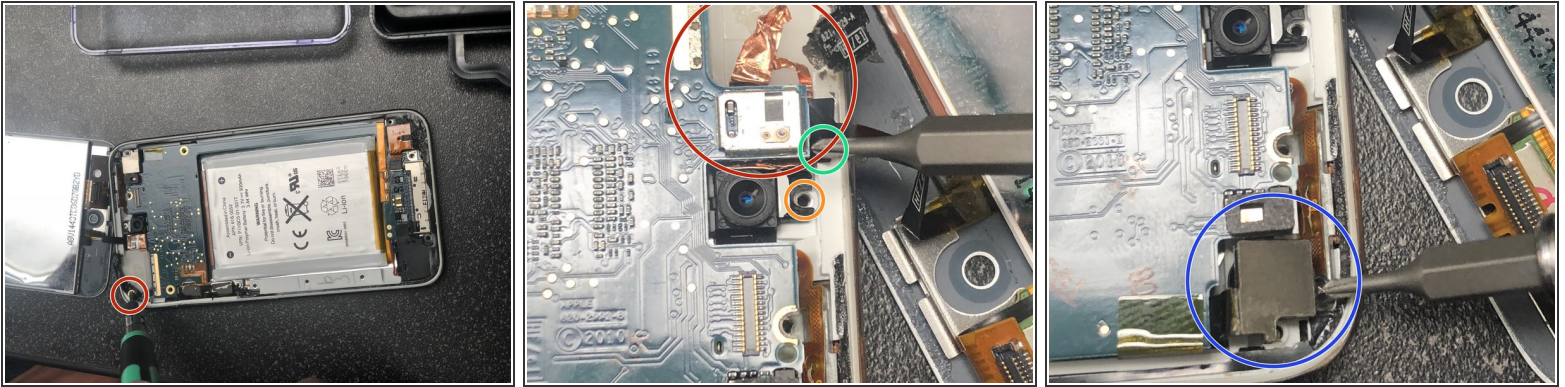

- with a heat gun 3 to 5 inches away on high heat up the glue the screen is held in with
- when holding wear gloves or a thick cloth it will be very HOT
- use a blade to separate from the casing

Step 2 — how to take off the metal plate

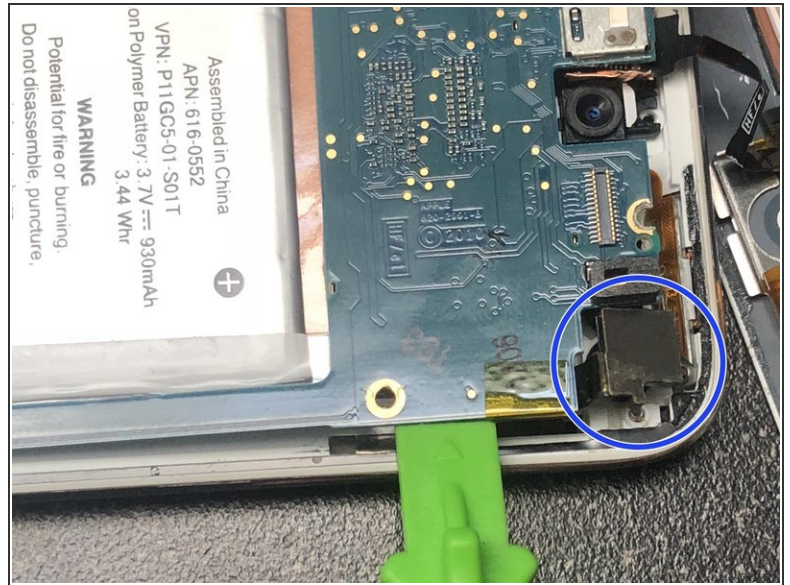

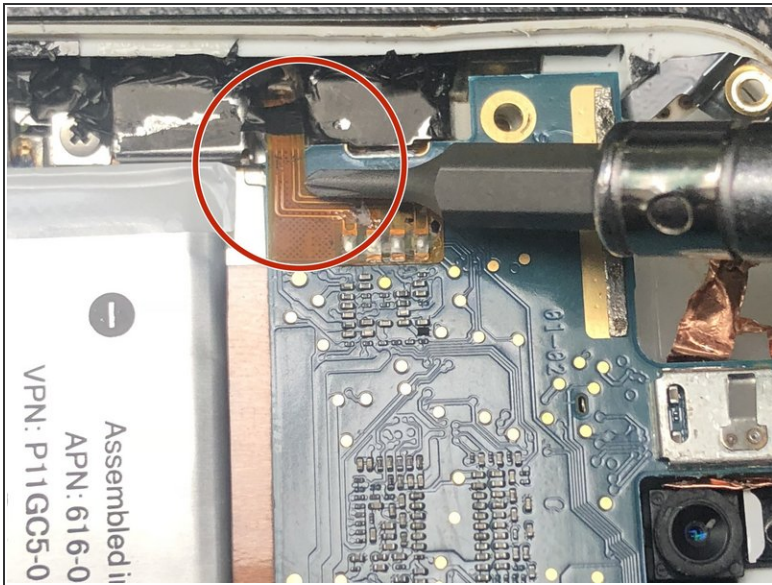

- with an blade slice the black strips on the metal plat from the casing
- take off all visible screws ALL make sure you take off all screws then with a plastic tool lift up the metal plate don t be shy use some force they are circled in red
- in blue peel off the wifi connector with a thin blade
- in the green just pop off the connector it is similar to a lego piece

Step 3 — how to completely take the screen off

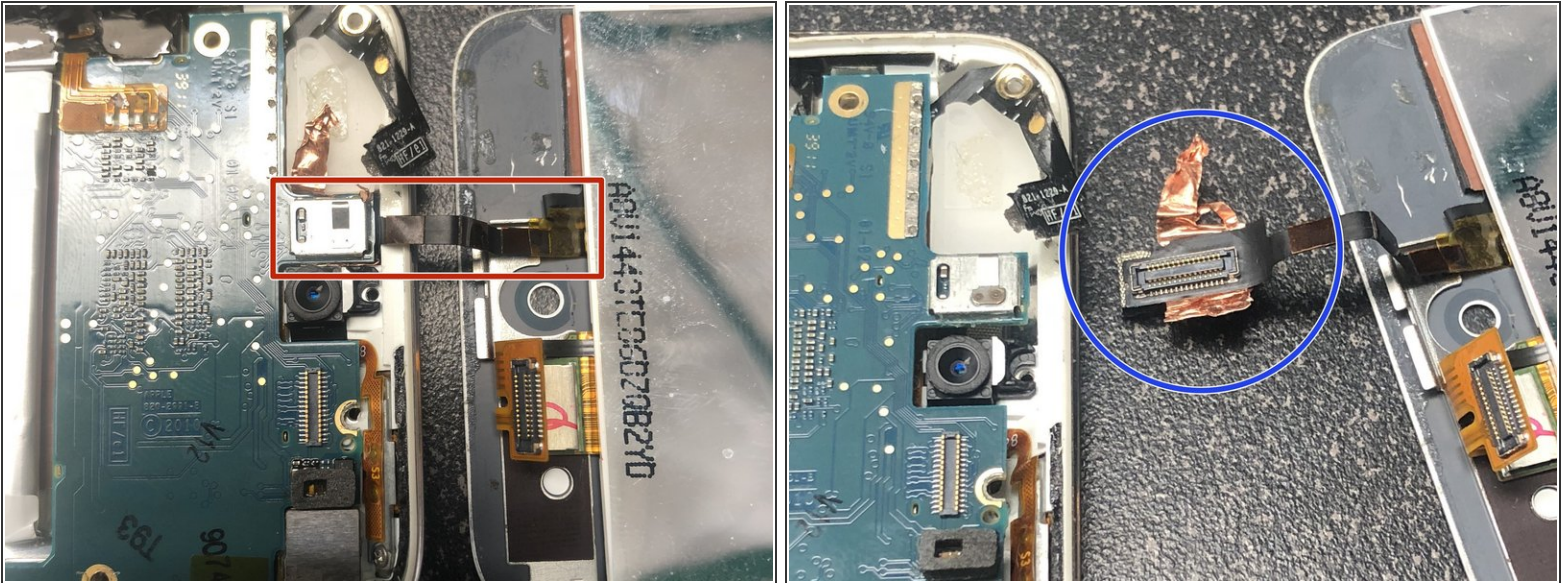

- take off the screw shown in the first picture
- also take off the metal plate use you plastic tool to take it off in the blue
- in the red unfold that thin foil type material
- in the orange be to first take out the screw holding the camera in
- in the green lift up the circuit make sure not to lift it to much as this can cause damage wait fot the next instructions to lift up

Step 4 — more on how to take off the screen

- when you do lift up the circuit be careful with the wire in the red so not to damage it
- in the blue is the back camera do not worried if you lift it out of place it simply pops back into place

Step 5

- in the red is what you will need to take off to fully disconnect the screen
- lift it up as instructed and pop of the connector it will be like a lego piece as well push down with a plastic tool to pop it off
- in the blue is what you will want yours to look like

Step 6

- this is what your ipod should look like as well

To reassemble your device, follow these instructions in reverse order.
