

iRobot Roomba 880 Error Code 6 Fix

Error Code 6: Move roomba to new location

Written By: Hector Mayorga

INTRODUCTION

Error code 6 was driving me crazy. The roomba would not move and keep saying Error Code 6, move roomba to new location. After a few days of troubleshooting, the solution was:

1: firmly press on the front top of the roomba, above the front wheel. This will adjust the front wheel back into place and not send a signal that it is on a cliff.

Step 1 — iRobot Roomba 880 Error Code 6 Fix

- Error code 6 was driving me crazy. The roomba would not move and keep saying Error Code 6, move roomba to new location. After a few days of troubleshooting, the solution was: 1: firmly press on the front top of the roomba, above the front wheel. This will adjust the front wheel back into place and not send a signal that it is on a cliff.

To reassemble your device, follow these instructions in reverse order.
