

iRobot Roomba 891 Extractor Assembly Replacement

This guide shows you how to remove and replace the extractor assembly in your Roomba.

Written By: Justin Tolin

INTRODUCTION

This easy guide show you the steps to remove and replace the extractor assembly on your roomba.

TOOLS:

- Flathead 3/32" or 2.5 mm Screwdriver (1)
- Phillips #2 Screwdriver (1)

PARTS:

- Extractor head module (1)

Step 1 — Battery

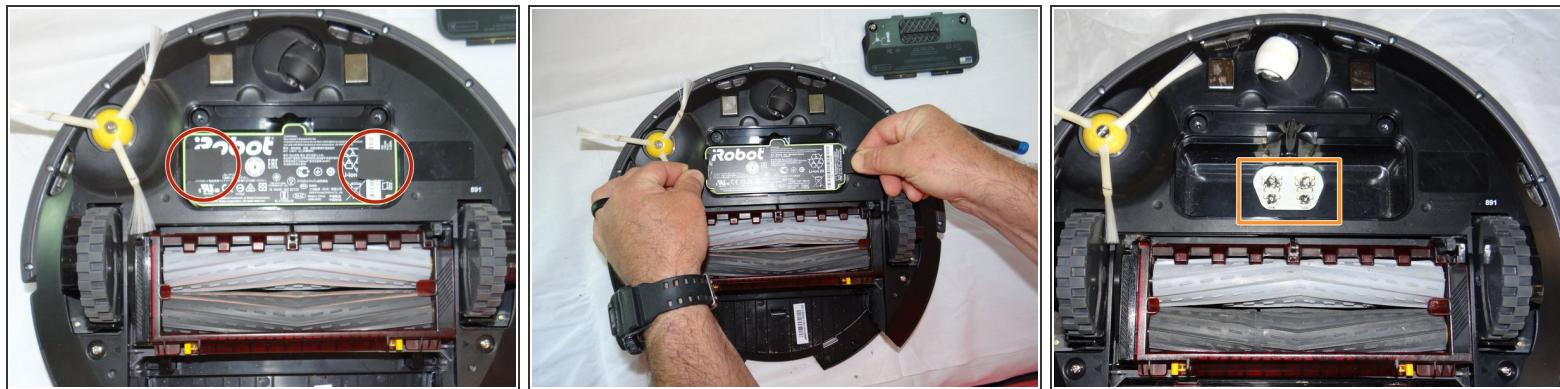

- Start by flipping your Roomba onto its back on a flat surface.
- ☒ Be sure not to close the side brush bristles in the battery door during reassembly as shown by the handy warning in the second photo.

Step 2

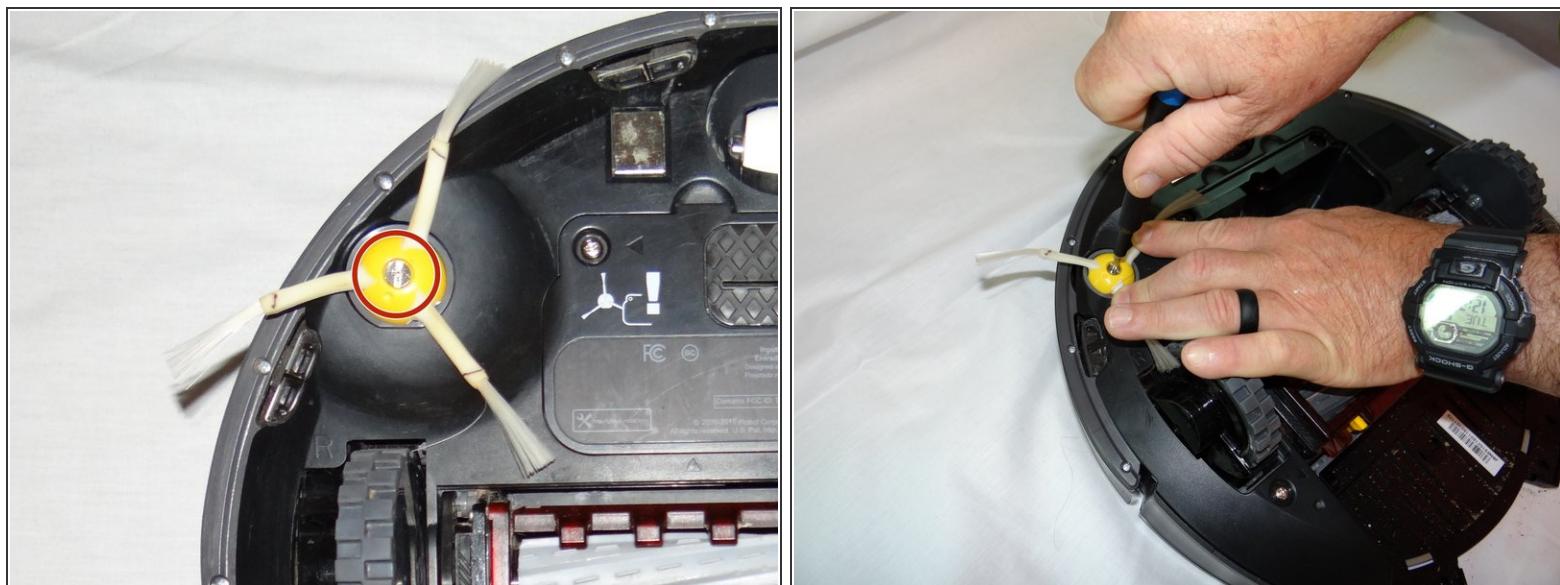

- Unscrew both the 11mm Phillips #2 screws from the battery cover and remove cover from the Roomba.
- ⓘ These captive screws are not intended to be removed from the cover.

Step 3

- Grasp the tabs on either side of the battery.
- Remove the battery by pulling up on the tabs.
- While you're here, check the battery contacts for corrosion or debris.

Step 4 — Side Brush

- Remove the 7.5mm flat head #4 screw from center of the side brush.

Step 5

- Gently pull the side brush off of the motor hub.

Step 6 — Extractor Assembly

- Remove the dustbin assembly from the Roomba.

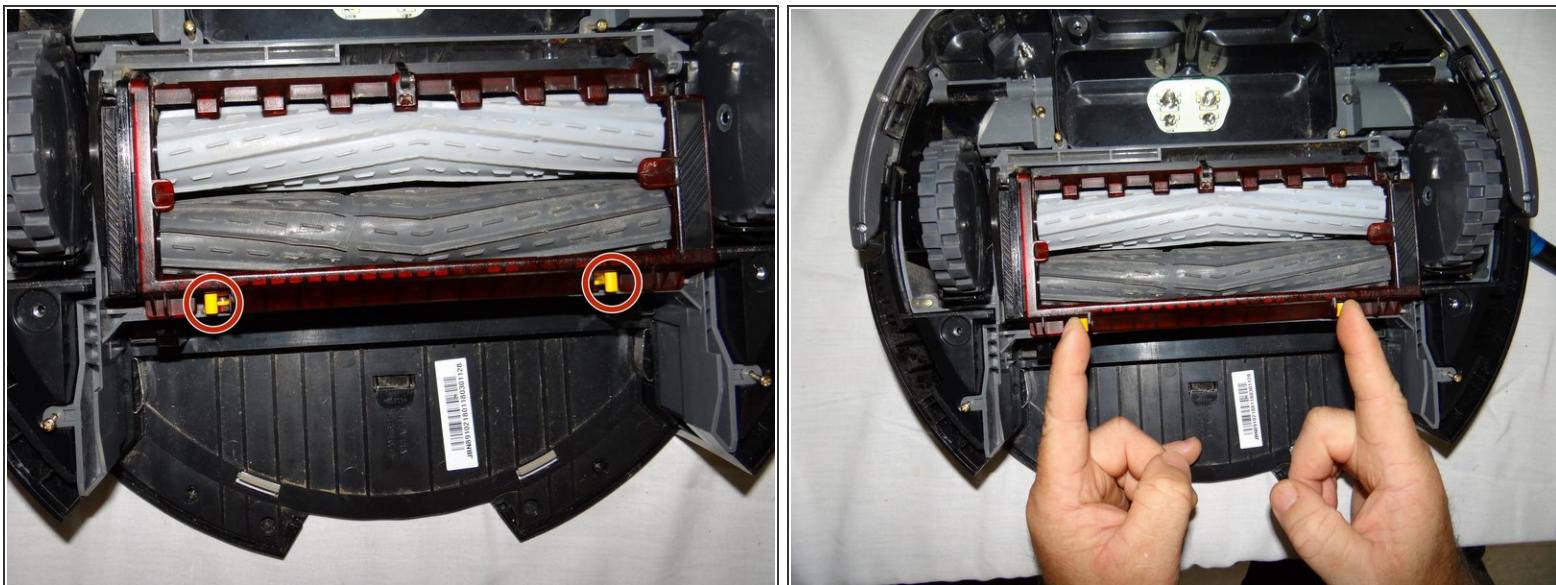

Step 7

- Unscrew the 2 phillips #2 11mm screws from roomba.

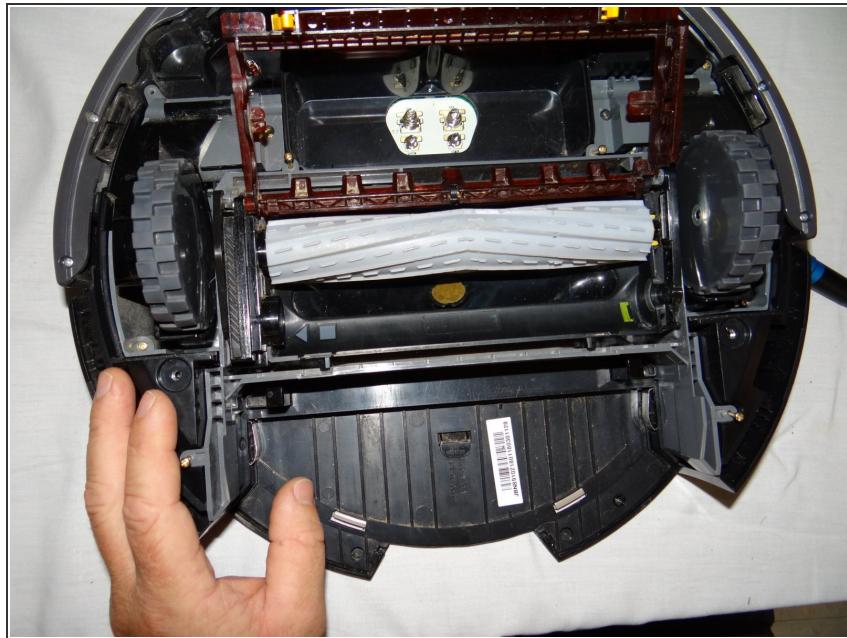

(i) These captive screws will remain in the bottom cover after being loosened.

Step 8

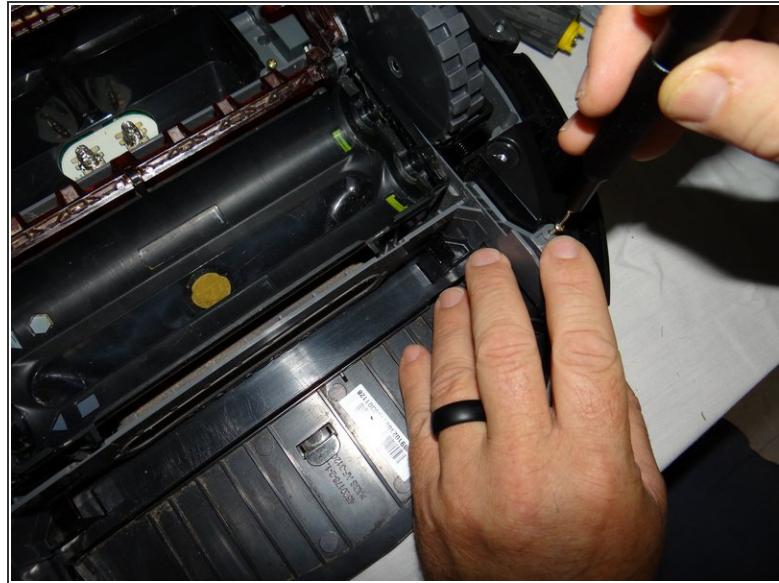

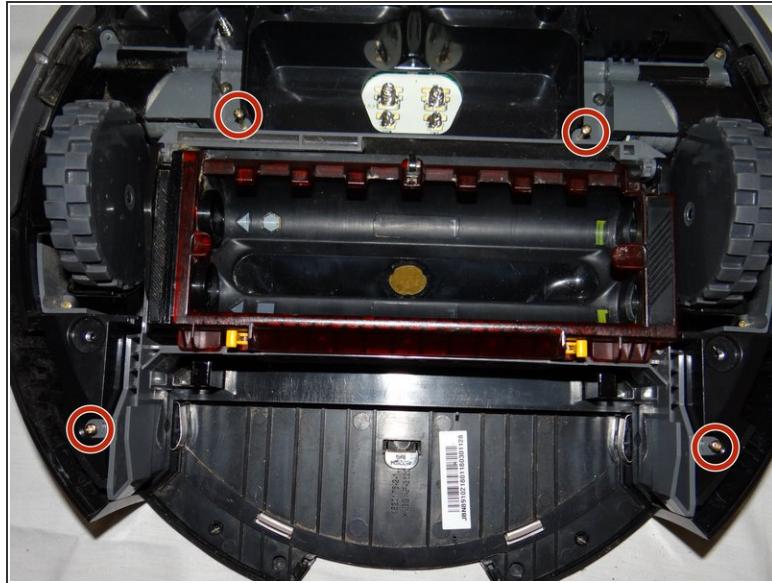

- Lift the yellow tabs and lift the red cover from the extractor assembly.

Step 9

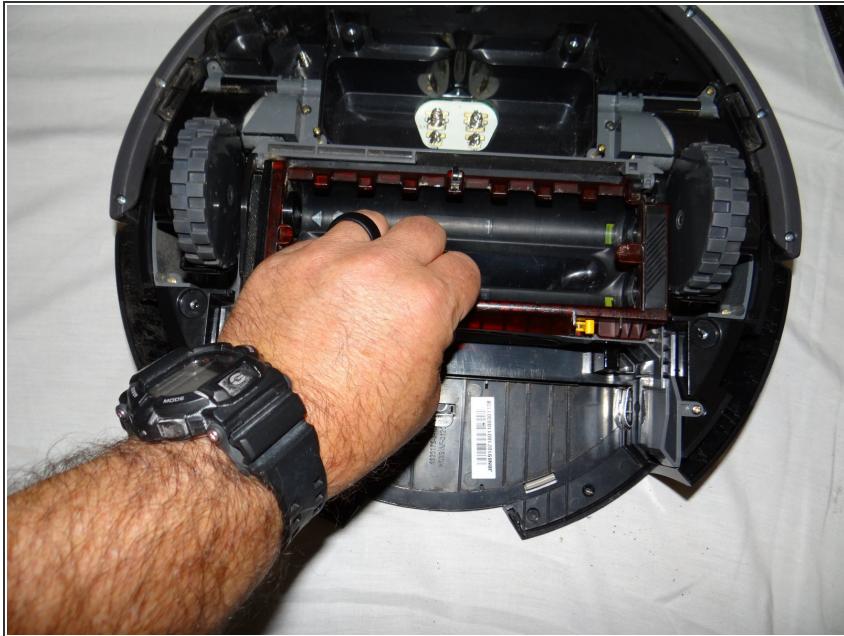

- Remove the rollers from the assembly by lifting it out from right side.

Step 10

- Close the cover and remove the four 11mm Phillips #00 screws from the assembly.

Step 11

- Grasp the center of the assembly and remove from the roomba.

To reassemble your device, follow these instructions in reverse order.
