iRobot Roomba 980 Battery Replacement

This guide will take you step-by-step to replace the battery on the Roomba vacuum.

Written By: Brandon Phan

INTRODUCTION

This guide is in case the battery for the iRobot Roomba 980 has failed to work or is performing poorly. It may be defective, damaged during use or reached the end of its charging life-cycle. Replacing the battery is a quick and easy process that will not take much time away from your daily routine.

TOOLS:

- Phillips #1 Screwdriver (1)

This document was generated on 2019-10-04 05:36:36 AM (MST).
Step 1 — Battery

- Flip over the device and remove the (2)11.5mm screws using the Phillips #1 screwdriver.

Step 2

- Unscrew the back plate using a Phillips#1 head screwdriver.

- Carefully lift the panel up once the screws are removed.

Step 3

- With both hands, grab the 2 black tabs on each ends of the battery.

- Pull the tabs upwards to remove the battery.

To reassemble your device, follow these instructions in reverse order.
