## INTRODUCTION

The camera is attached to the motherboard in your phone. A T6 screwdriver is needed to access the camera.

### TOOLS:

- [T6 Torx Screwdriver](#) (1)
-

## Step 1 — Back Cover

- Press down the button on the back panel.

## Step 2

- Push the back cover upwards.

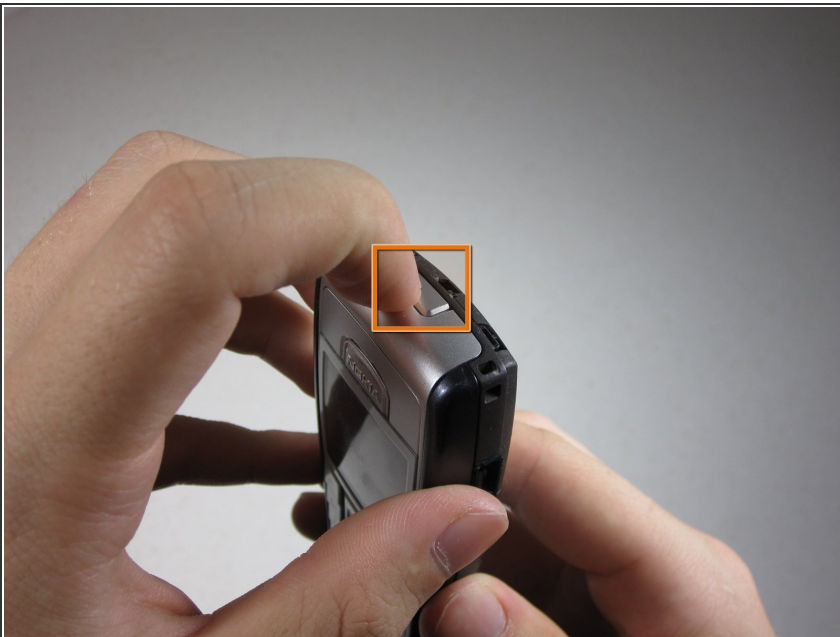

### Step 3

- Remove the back cover from the phone.

### Step 4 — Front Cover

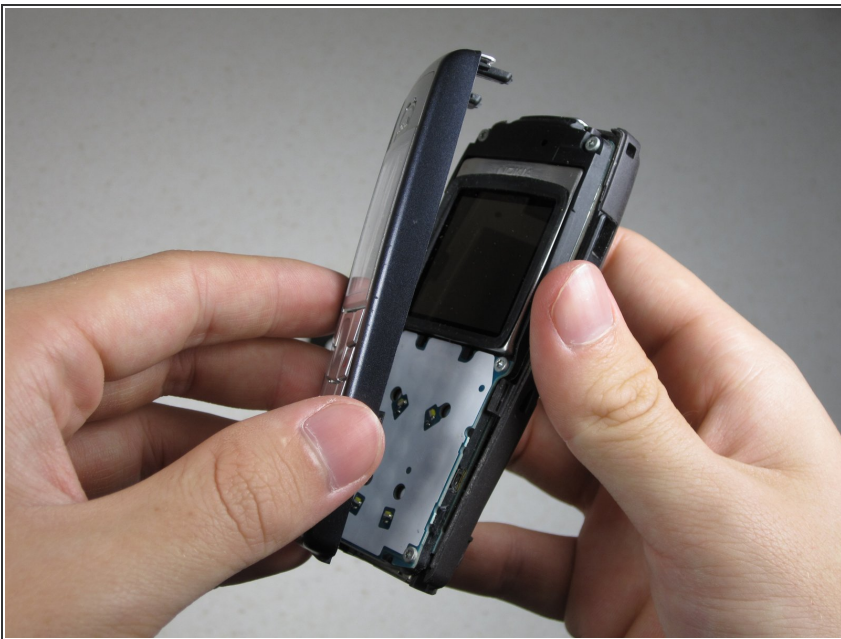

- Press the silver button on the top of the phone.

## Step 5

- Slide your thumbnail down the case seam to separate the rest of the case.

## Step 6

- Gently, remove the case.
- ⚠ Careful! Do not bend the plastic tabs.

## Step 7 — Motherboard

- Using a T6 Torx Screwdriver, unscrew and remove the six screws shown in the picture.

## Step 8

- Remove the panel that covers the motherboard.

**i** If replacing the speaker, stop at this step and skip forward to the first step of the speaker guide.

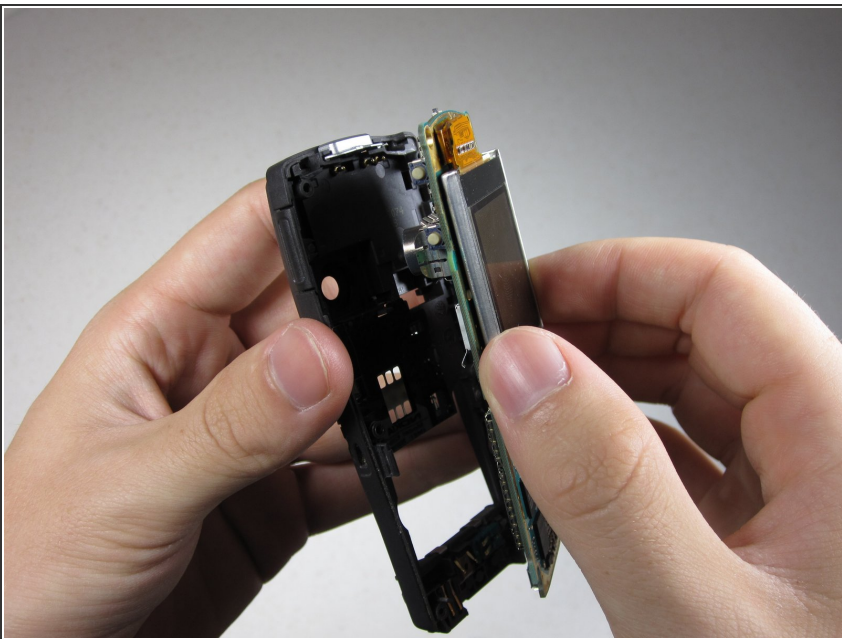

## Step 9

- Remove the LCD screen frame.

## Step 10

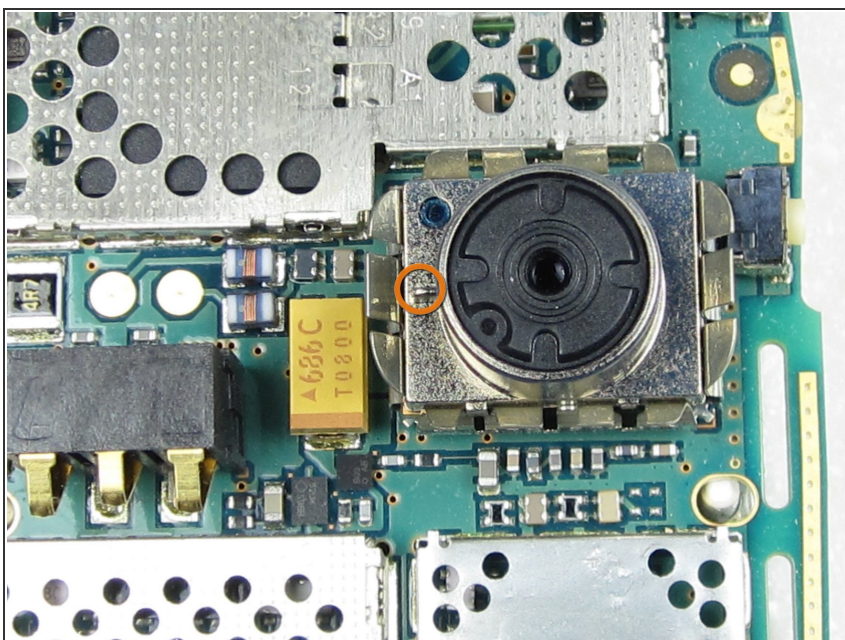

- Remove the motherboard.

## Step 11 — Camera

- Locate the camera on the circuit board.

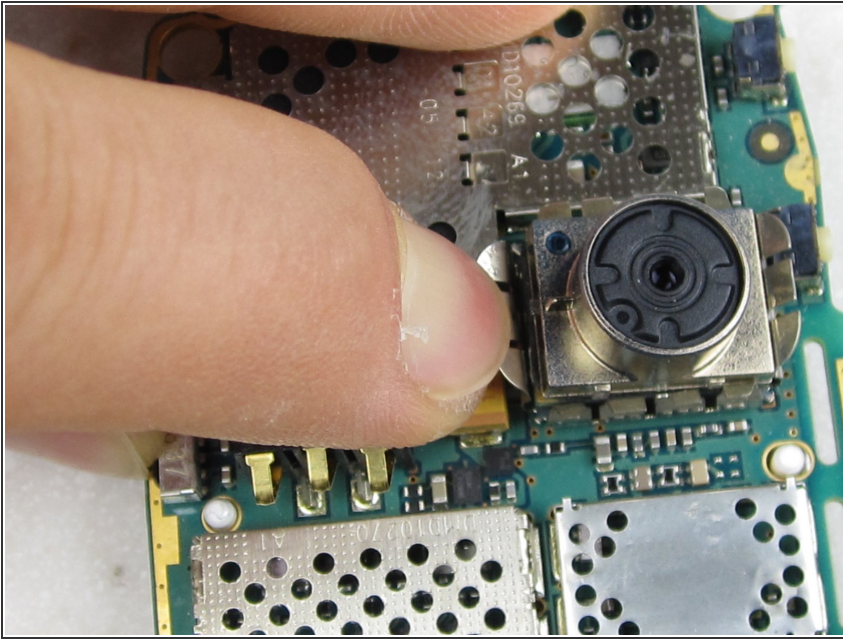

## Step 12

- Place the circuit board on a firm, static free surface (no cloth/carpet).
- NOTE: The circled alignment notch points to the left.

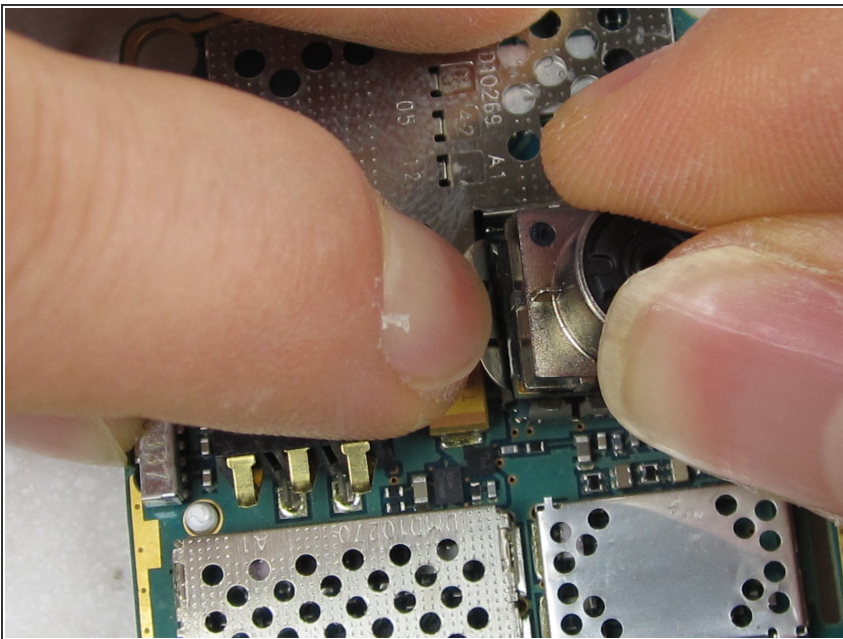

## Step 13

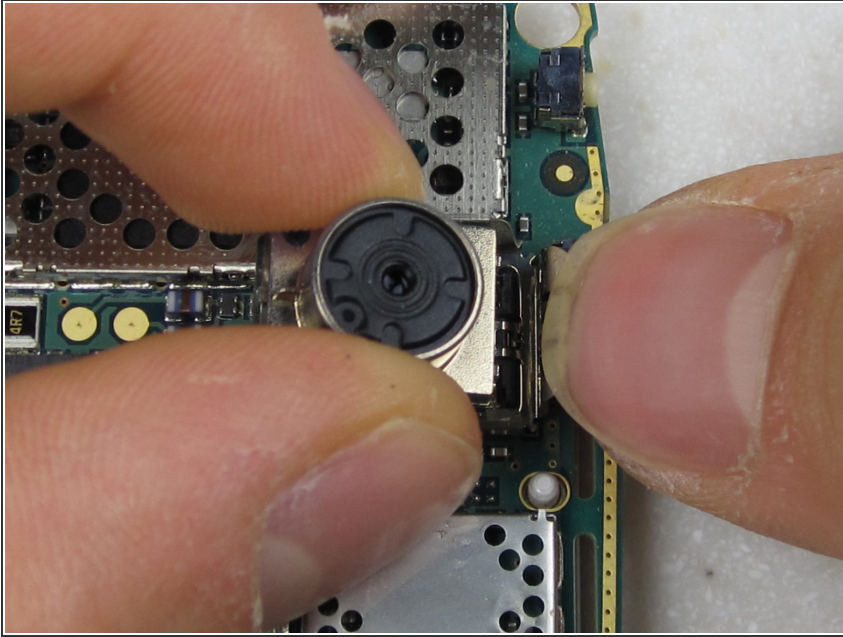

- Pull the left holding tabs to the left.

## Step 14

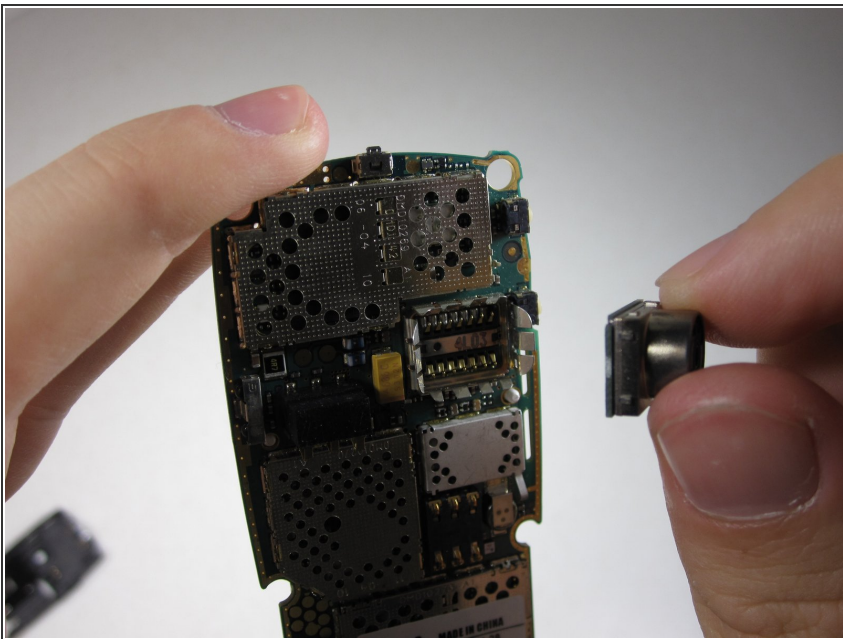

- Lift out the left side of the camera.

## Step 15

- Pull the right holding tabs to the right.

## Step 16

- Pull camera off of board.

To reassemble your device, follow these instructions in reverse order.
